settruncationchars

SetTruncationChars

Characters that should be used to determine when to truncate a field.

Phase

This instruction is used by the TapeTrack Import Engine.

Syntax

SetTruncationChars*(field, chars);*

string *field;*
string chars;

field	The field for this instruction.
chars	A string containing a list of characters which should be used for truncation.

Example

SetTruncationChars: Truncate the field VOLUME at any character- or [

```
SetTruncationChars(VOLUME, "-[");
```
