

# AddRepositoryOnMoveDate

Add Repository based upon the value of the Next Move Date.

## Phase

This instruction is used by the TapeTrack Synchronization Engine.

## Special Considerations

If a matching entry is found for AddRepositoryOnMoveDate the AddRepositoryOnWriteTime (if any) will not be checked.

## Syntax

```
AddRepositoryOnMoveDate(current_repository, range, target);
```

| Variable           | Type   | Description                | Min Length | Max Length |
|--------------------|--------|----------------------------|------------|------------|
| current_repository | String | Current Repository Filter. | 1          | 256        |
| range              | String | Range of Move Dates.       | 1          | 30         |
| range              | String | Target Repository value.   | 1          | 4          |

## Example

Move Volumes to RACK if their Move Date is today to 10 days from today. <sxh>

```
AddRepositoryOnMoveDate("*", "*:~+10", "RACK"); </sxh>
```
