

#Set the WRITEDATE format. SetWriteDateFormat("H:M:S d/m/Y");

AddRepositoryOnWriteTime

Extract the DESCRIPTION from column 11, length 100. Extract(DESCRIPTION, 11, 100, 0);

Set a Repository volume based upon a range of WRITEDATE. If the WRITEDATE is within one day move the Volume to LIBR and give it a one day MOVEDATE. AddRepositoryOnWriteTime(DESCRIPTION, "*YEARLY*", "0:1", "LIBR", "0:1");

Phase

If the DESCRIPTION contains YEARLY and the WRITEDATE is within one year move the Volume to OFFS and give it a one year MOVEDATE. AddRepositoryOnWriteTime(DESCRIPTION, "*YEARLY*", "0:0:1", "OFFS", "0:1:1"); </sxh>

Special Considerations

From:

<https://docs.tapetrack.com/> - TapeTrack Documentation

This instruction will not be invoked by the Synchronization Engine if Permanent AddRepositoryOnMoveDate entry has been used to change the Repository

<https://docs.tapetrack.com/engine/sync/addrepositoryonwritetime?rev=1539907649>

Last update:

Syntax

AddRepositoryOnWriteTime(field, filter, time, target, movedate); string *field*;
string *filter*;
string *time*;
string *target*;
string *movedate*;

field	A field for comparison.
filter	A filter to compare against.
time	Number of hours, days, months and years from the Write Date.
target	The Target Repository.
movedate	Number of hours, days, months and years from the Write Date to set the Move Date.

Example

Set the Repository based upon time from Write Date.**
