setminrepositorytime

SetMinRepositoryTime

Set the minimum number of minutes a Volume can be in a specific Repository.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetMinRepositoryTime*(repository, minutes);*

string repository;
integer minutes;

repository	A Repository filter for the Volume's Target Repository.
minutes	Number of minutes a Volume must be in a Repository before it can move.

Examples

SetMinRepositoryTime: Do not move a Volume if it has been off-site for less than one day.

SetMinRepositoryTime(“OFFS”, 1440);	Do not move a Volume if it has been off-site for less than one day.
