setpermanentdatevalue

SetPermanentDateValue

Set the date that is to be considered as permanent.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetPermanentDateValue*(date);*

string date;

date	The date that should be considered permanent.

Example

SetPermanentDateValue: Set the permanent date to 1971-01-01

Extract(MOVEDATE, 10, 10, 0);	Extract the MOVEDATE from offset 10, length 10 of the report body.
SetMoveDateFormat(“d/m/%%Y”);	Set the MOVEDATE format.
AddTranslation(MOVEDATE, “PERMANENT”, “01-01-1971”)	Translate the MOVEDATE date to 1971-01-01.
SetPermanentDateValue(“1971-01-01”);	Set the permanent date to 1971-01-01.
