# SetPermanentDateValue

Set the date that is to be considered as permanent.

## Phase

This instruction is used by the TapeTrack Synchronization Engine.

## Syntax

**SetPermanentDateValue**(*date*);

string *date;*

| | |
|---|---|
| date | The date that should be considered permanent. |

## Example

<sxh> # #

| | |
|---|---|
| Extract(MOVEDATE, 10, 10, 0); | Extract the MOVEDATE from offset 10, length 10 of the report body. |
| SetMoveDateFormat("%%d/%%m/%%Y"); | Set the MOVEDATE format. |
| AddTranslation(MOVEDATE, “PERMANENT”, “01-01-1971”) | Translate the MOVEDATE date to 1971-01-01. |
| SetPermanentDateValue(“1971-01-01”); | Set the permanent date to 1971-01-01. |
