SetPermanentDateValue

Set the date that is to be considered as permanent.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetPermanentDateValue(*date*);

string *date;*

date	The date that should be considered permanent.

Example

Set the permanent date to 1971-01-01

<sxh> # # Extract the MOVEDATE from offset 10, length 10 of the report body. Extract(MOVEDATE, 10, 10, 0);

Set the MOVEDATE format. SetMoveDateFormat(“d/m/%%Y”);

Translate the MOVEDATE date to 1971-01-01. AddTranslation(MOVEDATE, “PERMANENT”, “01-01-1971”)

Set the permanent date to 1971-01-01. SetPermanentDateValue(“1971-01-01”);

</sxh>
