SetPermanentDateValue

Set the date that is to be considered as permanent.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetPermanentDateValue(*date*);

string *date;*

date	The date that should be considered permanent.

Example

Set the permanent date to 1971-01-01

```
#
# Extract the MOVEDATE from offset 10, length 10 of the report body.
Extract(MOVEDATE, 10, 10, 0);

# Set the MOVEDATE format.
SetMoveDateFormat("%%d/%%m/%%Y");

# Translate the MOVEDATE date to 1971-01-01.
AddTranslation(MOVEDATE, "PERMANENT", "01-01-1971")

# Set the permanent date to 1971-01-01.
SetPermanentDateValue("1971-01-01");
```
