

SetPermanentDateValue

SetPermanentDateValue has been deprecated. The following information is for legacy installations only.

See [SetPermanentMoveDateValue](#) and [SetPermanentExpiryDateValue](#)

Set the date that is to be considered as permanent.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetPermanentMoveDateValue(*date*);

string *date*;

date	The date that should be considered permanent.
------	---

Example

Set the permanent date to 1971-01-01

```
#  
# Extract the MOVEDATE from offset 10, length 10 of the report body.  
Extract(MOVEDATE, 10, 10, 0);  
  
# Set the MOVEDATE format.  
SetMoveDateFormat("%d/%m/%Y");  
  
# Translate the MOVEDATE date to 1971-01-01.  
AddTranslation(MOVEDATE, "PERMANENT", "01-01-1971")  
  
# Set the permanent date to 1971-01-01.  
SetPermanentMoveDateValue("1971-01-01");
```
