SetVolumeScript

Set a script to be called for each of the updated volumes.

Phase

This instruction is used by the TapeTrack Synchronization Engine.

Syntax

SetVolumeScript(*script*);

string *script;*

script	The script to be called for each Volume.

Before each script is called the engine will resolve the variables $CUSTOMER-ID, $MEDIA-ID, $VOLUME-ID.

Example

SetVolumeScript: Eject all tapes that are being moved.

<sxh> # # Eject all tapes that are being moved. SetVolumeScript(“eject $VOLUME-ID”);

</sxh>
