TapeTrack for iPhone

Sign-in Settings

You can sign-in to the iPhone TapeTrack app using either a 4 digit Passcode, or your iPhone's Touch-ID sensor (if supported).

In the event you have forgotten your Passcode, you can reset the pin using the `Reset PIN` button on the `Sign-in Settings` screen. If you select this option your adapter settings (including credentials) will be erased. Please note that as the adapter data is hosted remotely this will not be erased.

List Option

The List screen will display your Libraries and their contents.

Scan Option

There are 4 reasons why somebody would want to scan a tape with this App, and it is often different people who are scanning.

Move

Scan to Move: This is done by the tape owner who wants to tell the software that certain tapes have to move from one location to another. This will place the tape in a “move status”.
