

Adding New Volumes

Adding new [Volumes](#) to Tapetrack can be accomplished using one of two methods.

Adding New Volumes Using Volume Management

Adding New Volumes Using Send

Using Send to add new [Volumes](#) is only recommended when the new [Volumes](#) are part of a consignment being sent already. If just adding new [Volumes](#) to the inventory using Volume Management is the correct process to use.

Select Send from the **Task Menu** and click Next to continue.
