

Move Lists

The move lists displays all tapes currently in a move status including volume ID, current and target location, elapsed move time, scanned out status and whether the volume is overdue at it's intended target.

Volumes can have their move revoked or canceled by right-clicking selected volumes and choosing **Operations** → **Cancel Move**

TapeTrack Lite™ - Move Lists

Instructions

The Move List screen allows you to see moving Volumes for each Media Type

You can also perform operations such as cancelling existing move requests.

Volume	Current	Target	Move Time	Scanned-Out	Overdue
