Move Lists

The TapeTrack Lite Move Lists function allows you to manage view moving Volumes for each Media type.

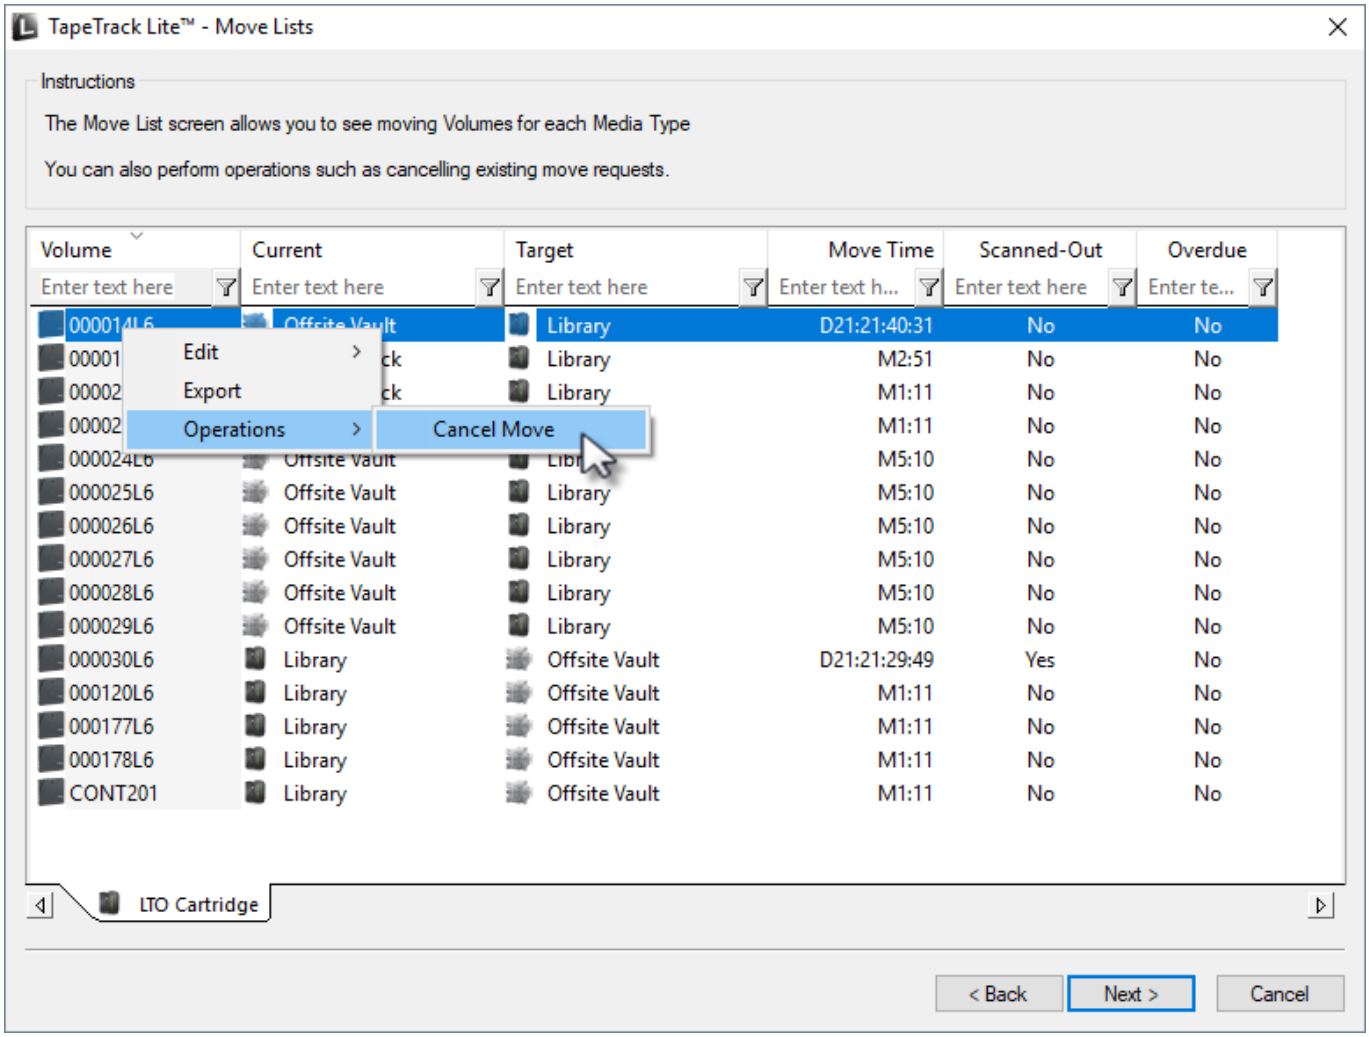

The **Move list** window displays all Volumes currently in a move status including Volume-ID, current and target location, elapsed move time, scanned out status and whether the Volume is overdue at its intended target Repository.

Select Move Lists

Select `Move Lists` from the drop-down task menu and click `Next` to continue.

Move List Right Click Options

- **Edit**
  - **Copy**: Volume-ID's can be copied to the Windows clipboard by selecting the required volumes and right clicking the highlighted Volume/s and selecting `Edit → Copy`.
- **Export**: Reports can be exported by selecting the required volumes and right clicking the highlighted Volume/s and selecting `Export`.
- **Operations**
  - **Cancel Move**: Volumes can have their move revoked or canceled by right-clicking highlighted Volumes and selecting `Operations → Cancel Move`
