

Scan-Out

The TapeTrack Lite Scan-Out function allows you to place **Volumes** in a move status from their Current Repository to a Target Repository.

When a **Volume** is put into a move status this only represents the request to move the **Volume** and a second step is required to confirm the movement of the **Volume** when it arrives at the Target Repository.

Scan-Out Process

The Scan-Out video is intended as a companion to the instructions.

Best results are obtained by reading the instructions and then viewing the implementation of the process via the video

Selecting Scan-Out

Select Scan-Out from the **Task Menu** and click Next to continue.

Options

This will open the **Options** window. If required you can set the location for the log files to be written to, or leave the default.

To change the default directory, click in the field to the right of the Log File Folder and click on the (...) button and select directory.

Click Next to continue.

Customer Selection

Select the account or customer that you want to manage tapes for by double-clicking the **Customer-ID** or left-clicking the **Customer-ID** and clicking Next at the bottom of the page.

TapeTrack Lite™ - Customer Selection

Instructions

The Customer Selection screen allows you to select one TapeTrack Customer that will be the subject of operations in subsequent screens.

You may select a Customer by double clicking the Customer, or by clicking the Customer and pressing the Next button.

Customer	Volumes	Moves
New York Data Center	56	0
Los Angeles Data Center	23	7
North Carolina Data Center	56	23
Nashville Data Center	52	9
	187	39

☒ Remember previously selected Customer

< Back

Next >

Cancel

Checking Remember previously selected Customer will retain the currently selected **Customer** for future Lite functions.

This can be removed at any time by unchecking Remember previously selected Customer

Scan-Out Location

In the **Scan-Out Location** window select a Repository to Scan-Out the **Volumes** from by double-clicking on the Repository or left-click to select Repository and click Next to proceed.

Scan-Out Container Location

If using Containers with unique identities, select from the displayed list the required Containers to assign the Volumes to. Select one Container by double-clicking or by left-clicking Container ID and clicking Next. To select multiple Containers control + left-click to select required choices. Containers can also be Scanned-Out by clicking the Open **Volume Scan-In** window by clicking on Scan-in Button which will launch the [Desktop Scan Window](#) and scan required Containers.

If **Volumes** have already been assigned to a Container via TapeMaster or Sync process, the correct Container/s will be pre-selected and shown in a grey background, or blue background when the window is clicked on.

If no Containers are needed simply click Next.

Scan-Out Volumes

The **Scan-Out Volumes** window will display the tapes eligible for Scanning-Out of the selected Customer and Repository.

This window also, by default, opens the **Scan-Out Volumes Input** window. Customer-ID and Media-ID values can be entered in the upper right Defaults panel to automatically add these values to the scanned barcodes if scanning unqualified barcodes. The field Edit in the Defaults panel can be used to add prefix or suffixes to the **Volume-ID**.

For example, setting the Customer-ID field to US01, Media-ID field to LTO and edit field to *L5 will change a barcode of 123456 to US01.LTO.123456L5.

Notes:

- **A** The Scan-Out window shows the items that need to be scanned.
- **B** The Scanned Item tree shows the items that have been scanned and associated Containers. The Container shown in bold signifies the current Container allocation for scanned Volumes
- **C** The Scanner button allows you to reiterate the Scanner Window.
- **D** The Scan-Out Log option lists any errors in scanned Volumes .

Scan-Out the required Volumes using your preferred scanning method.

When finished scanning out Volumes click Next to continue. If you have not Scanned-Out the entire list a warning of Unscanned Items will be displayed. If you wish to Scan-Out the rest of the Volumes click No to return to the Scan-Out Volumes window. If you wish to continue and leave the remaining Volumes unscanned (they can be scanned out at a future time) click Yes to continue.

Scan-Out Container Update

From here you can set the next move date, add descriptions for the Container/s and whether to Scan-Out the Container/s as well as the [Volumes](#) .

Instructions	
The Scan-Out Location Selection screen allows you to select a single Repository.	
Settings	
Scan-Out Containers	True
Containers	
US01.CONT.CONT002	
Target Repository	Offsite Vault
Newly assigned Volumes	3
Next move	Friday, April 19, 2019 (Today)
Description	
Data-Cluster	

This will bring up the **Complete** window, from here you can:

- Click View Log File to view the log file of the last completed process..
- Click Print Log File to save a PDF of the log file to print from your PDF viewer.
- Click About this Software to view product and support (email, phone & website) information.
- Click Back button to return to start menu and select another task.
- Click Finish button or X at the top right of the window to exit TapeTrack Lite.
