Upload and Download Files

Prerequisites

Menu option **Upload and Download Files** needs to be enabled via the Lite config file

File Upload Process

Select `Upload And Download File` from the **Task Menu** and click `Next` to continue.

Options

This will open the **Options** window. If required you can change the location for the log files to be written to, or leave the default.

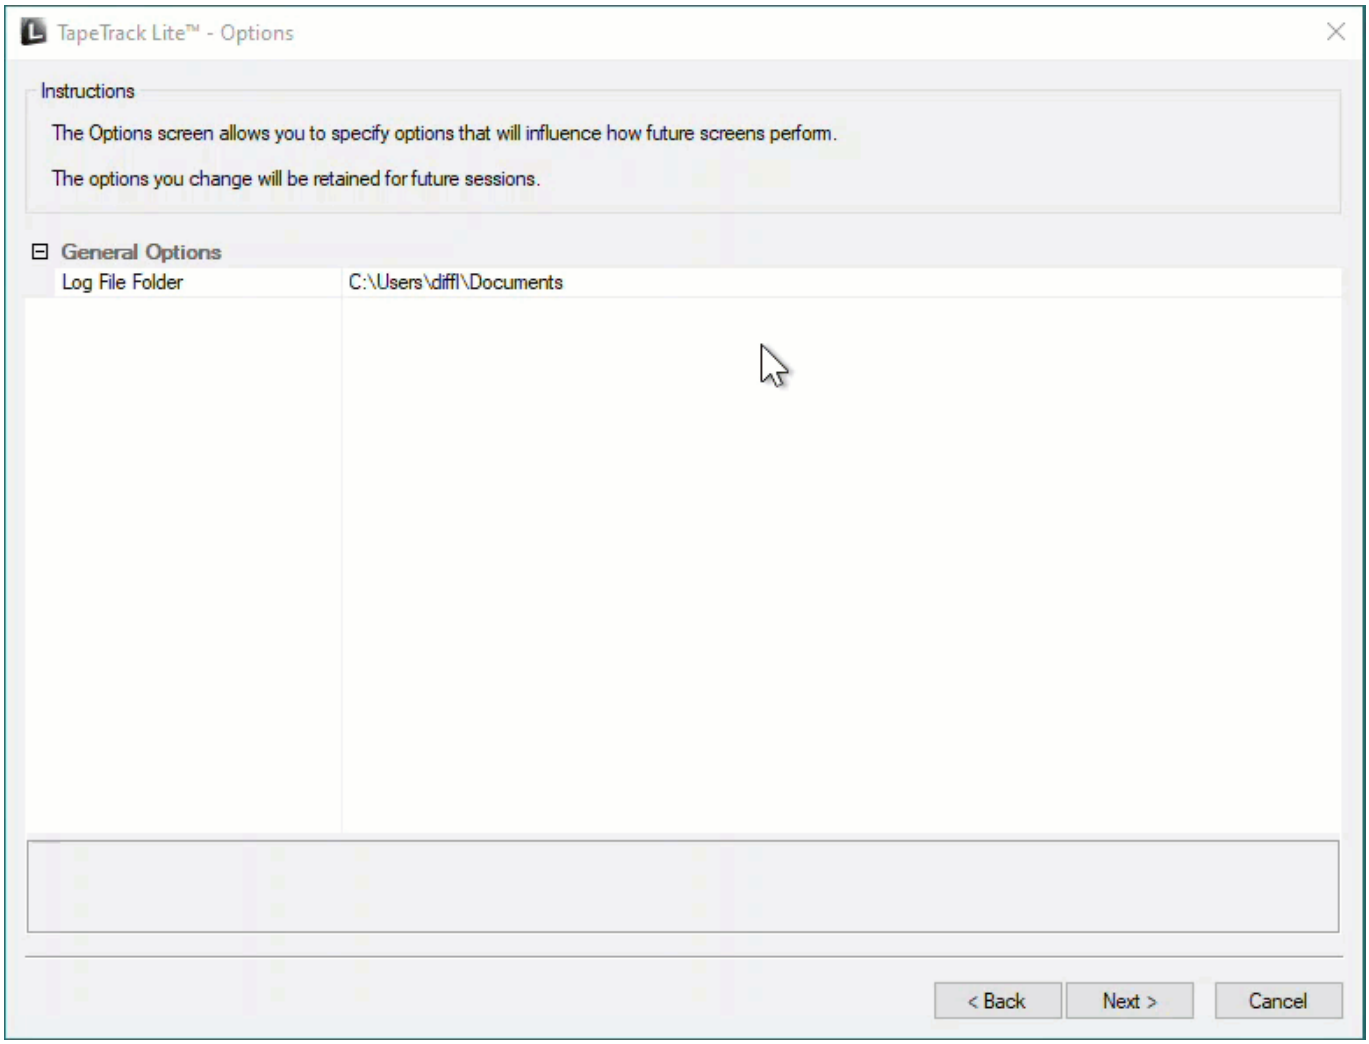

To change the default directory, click in the field to the right of the Log File Folder and click on the (...)

button, select the required directory and click OK to save.

Setting the directory location in the Lite configuration file will skip this window and write the log file to that location.

Click `Next` to continue.
