Adding Volumes To Container

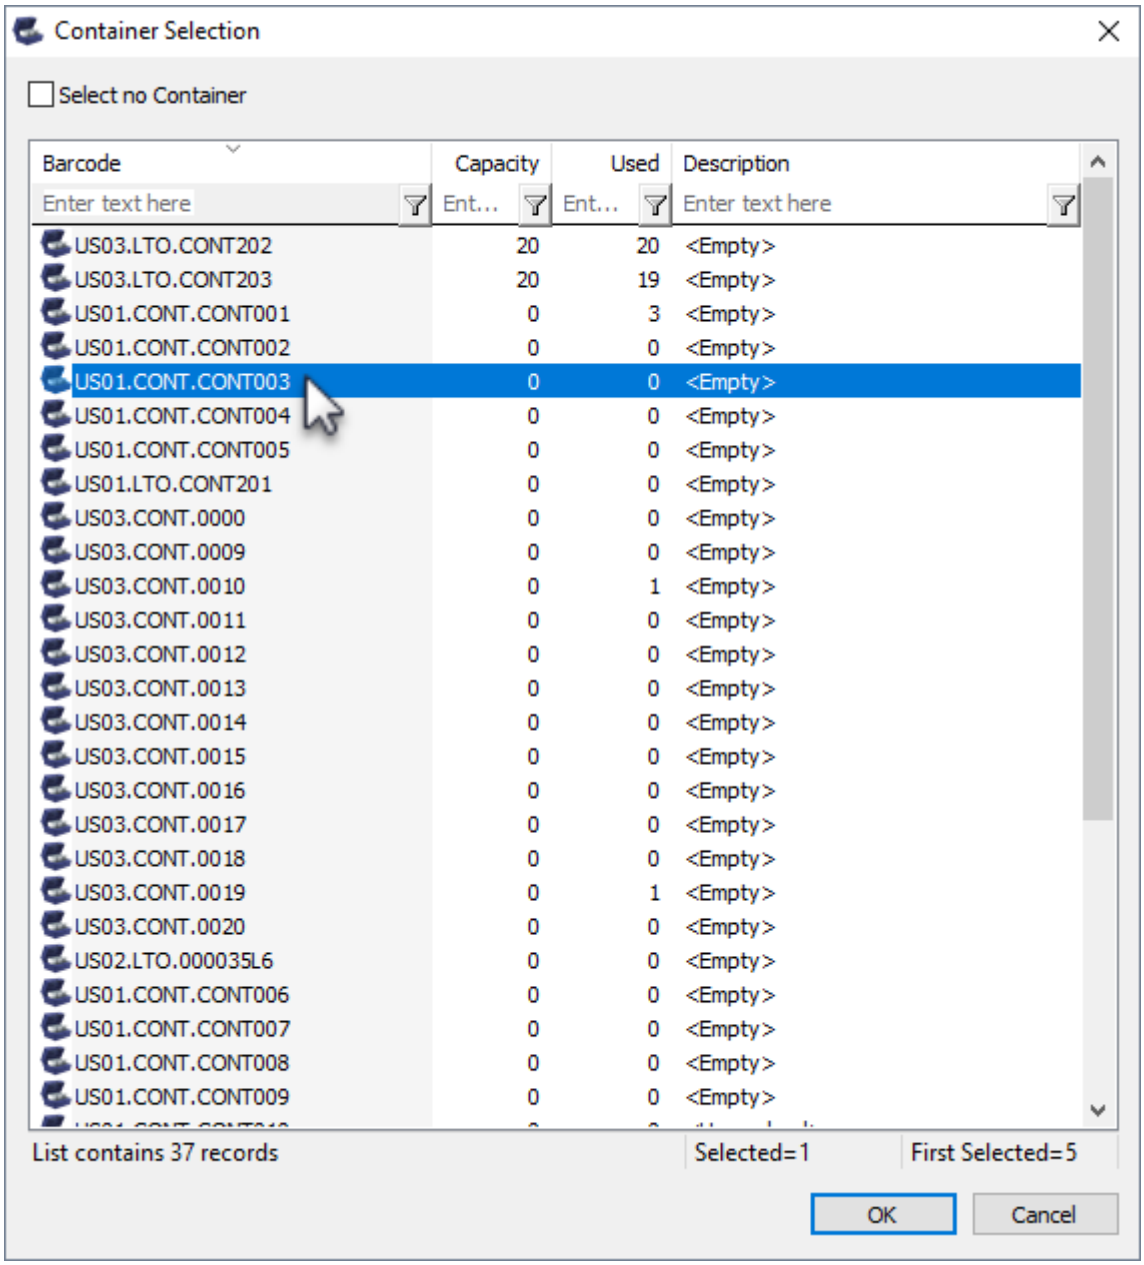

master_volume-to_container.mp4

Select a volume or range of volumes (Shift+Click and or control + click) from the inventory window to assign to a container.

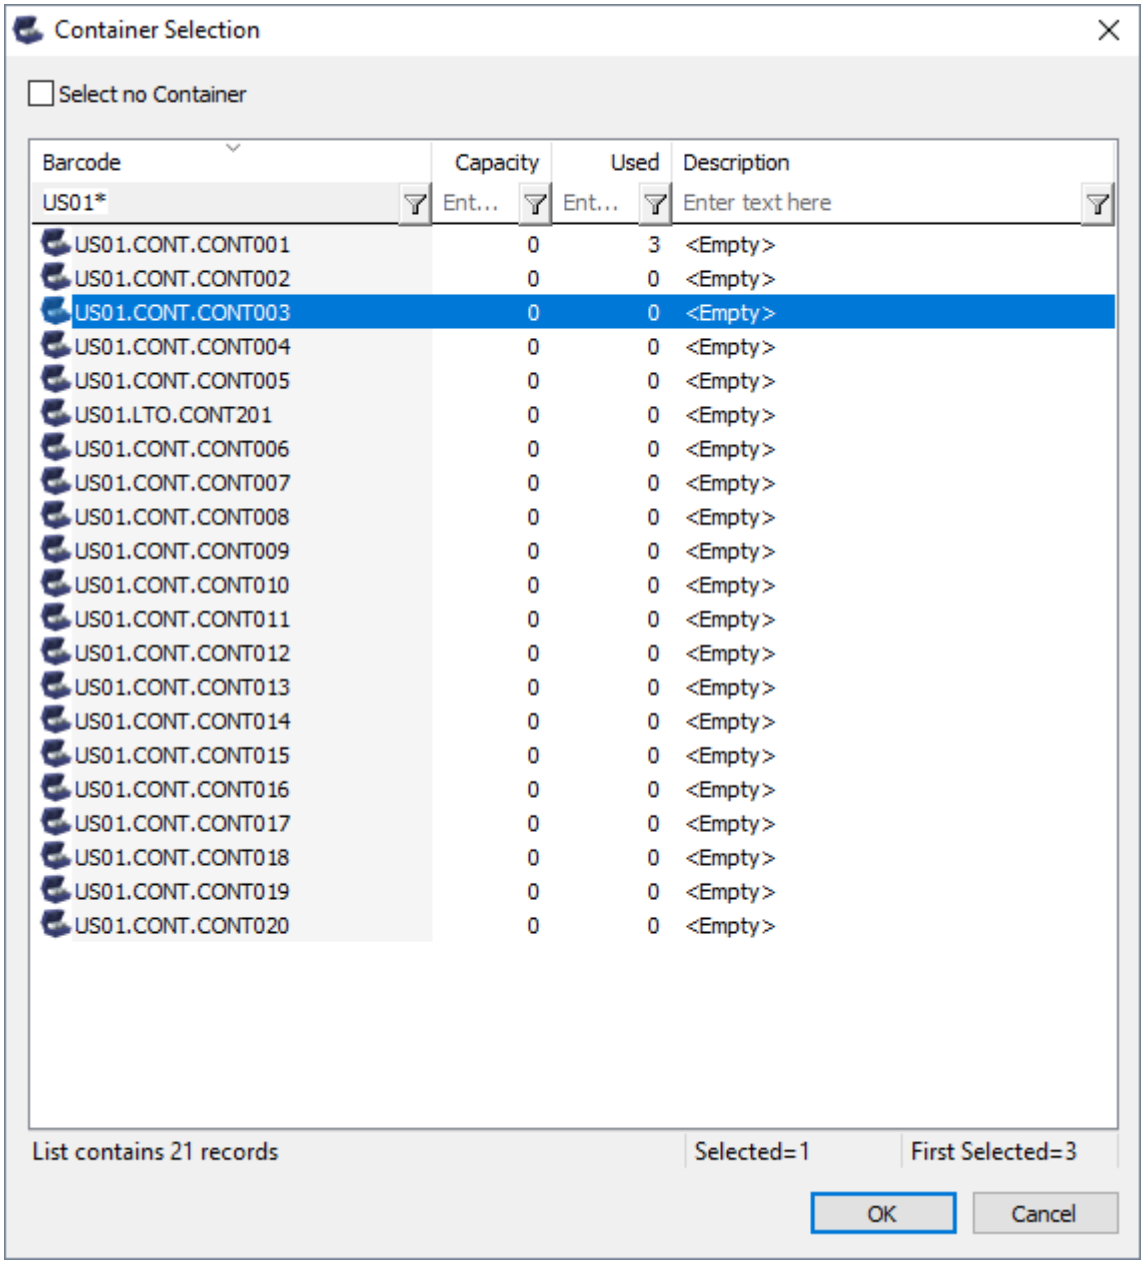

Right Click highlighted volume/s and select `Special Operations→Modify→Assign to new/no container`.

Select the required container from the displayed list and click OK.

If you have a large quantity of containers for multiple customers, filtering results on barcode values (e.g. **US01*** for all US01 containers) can simplify the selection by removing unwanted containers from the display.

Other filters, container capacity, container content quantity (ie. use 0 for empty containers) or description can also be used to narrow results for container selection.

Click OK to save results and exit back to the inventory window.
