Adding Volumes To Container

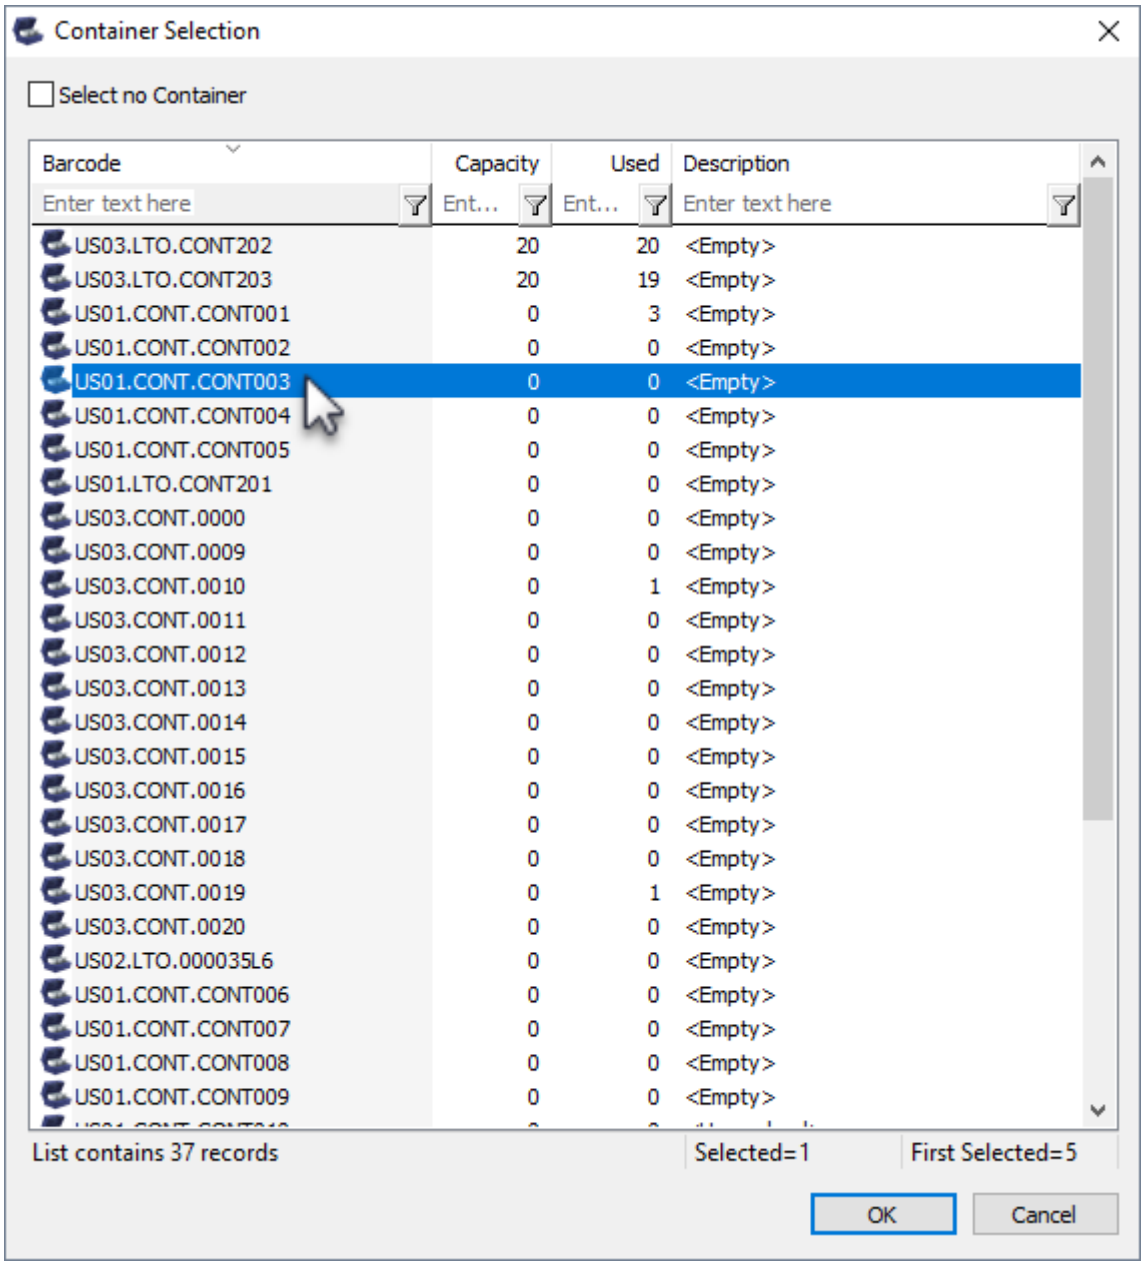

master_volume-to_container.mp4

Select a volume or range of volumes (Shift+Click and or Ctrl+Click) from the inventory window to assign to a Container.

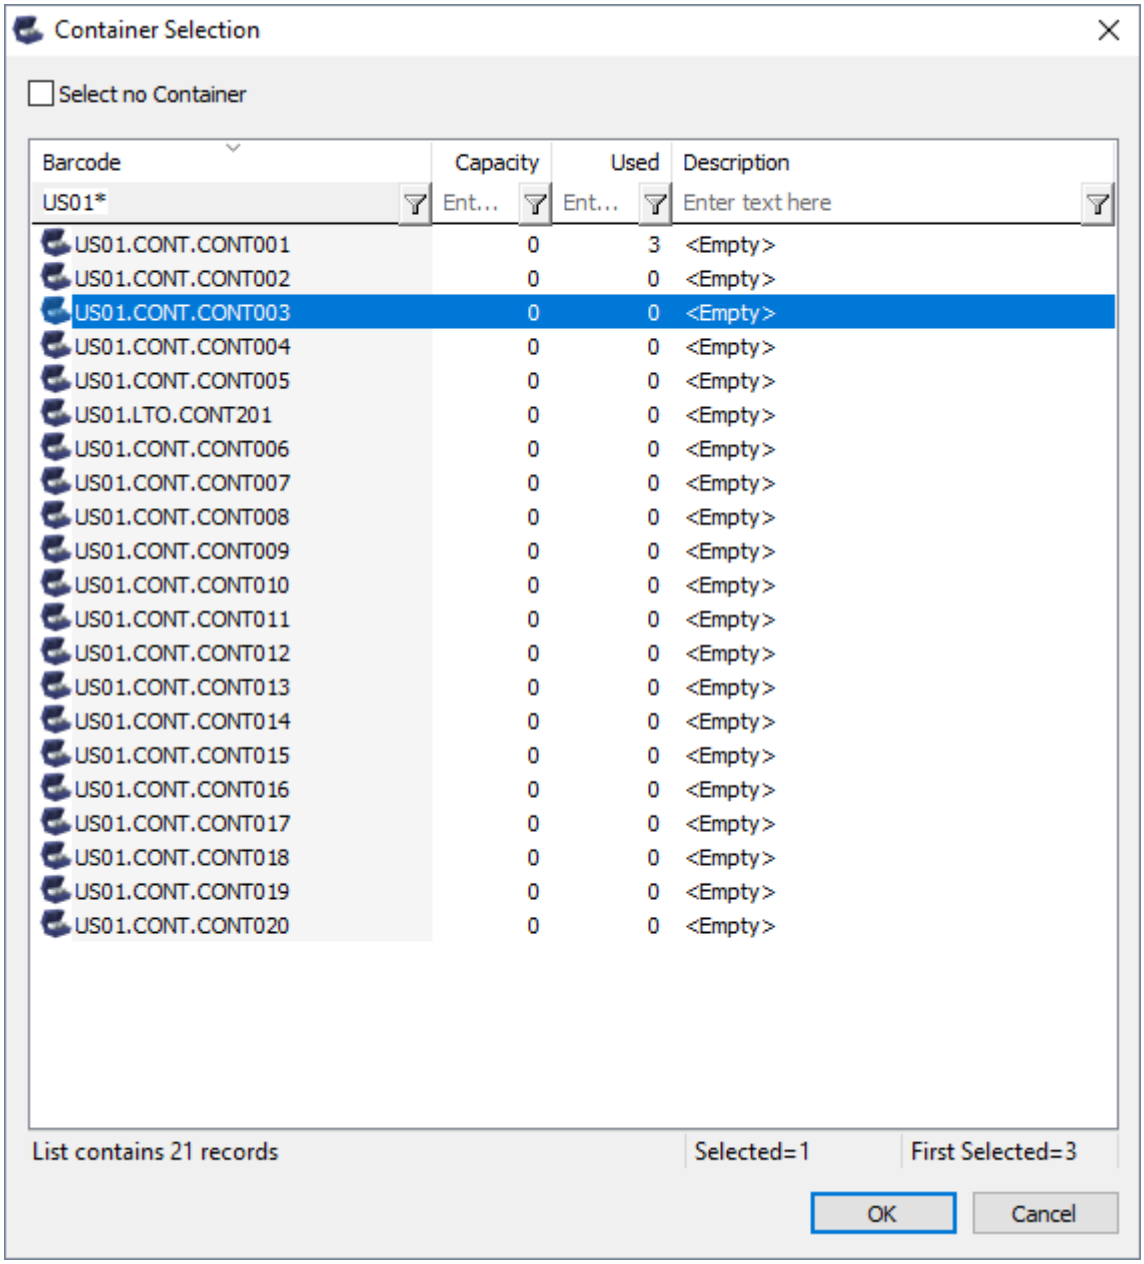

Right-Click highlighted volume/s and select `Special Operations→Modify→Assign to new/no Container`.

Select the required Container from the displayed list and click OK.

If you have a large quantity of Containers for multiple customers, filtering results on barcode values (e.g. **US01*** for all US01 Containers) can simplify the selection by removing unwanted Containers from the display.

Other filters, Container capacity, Container content quantity (ie. use 0 for empty Containers) or description can also be used to narrow results for Container selection.

Click OK to save results and exit back to the inventory window.
