

Active User

Overview

The active user function displays a snapshot of current users logged into the TapeTrack Server.

Active User List

The active user list displays information about the users currently connected to the TapeTrack Server. The display includes:

- Slot
- Sequence
- User-ID
- User Name
- Interface
- Requests
- Bytes Sent
- Bytes Received
- Idle time
- IP Address
- Connected Date and Time
- Time Connected

Total Items 1

Double clicking, or right clicking and selecting properties, will open a connection properties display window for the selected user (or range of users). This will display the above information as well as connection details such as the port access. This window also allows you to disconnect the selected user by clicking the Disconnect button. Users may also be disconnected by right clicking a user ID and selecting Disconnect.
