Server Statistics

Overview

Server statistics displays a list of processes or commands between TapeTrack software and the FrameWork Server.

Server Statistics

the Server Statistics window displays a list of transactions between the users Tapetrack software, such as TapeMaster or Lite, and the FrameWork Server Database. The information includes:

- Transactions
  - Transaction description
  - Number of times that transaction type has been executed
  - Number of records accessed with that type of transaction
  - Bytes transmitted
  - Average transaction time
  - Error count
  - Last time transaction executed
- Databases
  - Database file accessed
  - Database file description
  - Database file size
  - Unique keys
  - Total keys
  - Type
  - Recreatable
- Connections
  - IP address used to connect to database
  - Number of connections from this IP address
  - Time and date of last connection
  - Time and date of first connection
  - Percentage of total connection time
- Downtime
  - Date and time of server going offline
  - Date and time of server coming back online
  - Duration of time server was offline
- Replication
  - Statistics of replicated server messages, failed connections and dropped connections
  - Replication server details
