

Server Statistics

Overview

Server statistics displays a list of processes or commands between TapeTrack software and the FrameWork Server.

Server Statistics

the Server Statistics window displays a list of transactions between the users Tapetrack software, such as TapeMaster or Lite, and the FrameWork Server Database. The information includes:

- Transactions
 - Transaction description
 - Number of times that transaction type has been executed
 - Number of records accessed with that type of transaction
 - Bytes transmitted
 - Average transaction time
 - Error count
 - Last time transaction executed
- Databases
 - Database file accessed
 - Database file description
 - Database file size
 - Unique keys
 - Total keys
 - Type
 - Recreatable
- Connections
 - IP address used to connect to database
 - Number of connections from this IP address
 - Time and date of last connection
 - Time and date of first connection
 - Percentage of total connection time
- Downtime
 - Date and time of server going offline
 - Date and time of server coming back online
 - Duration of time server was offline
- Replication
 - Statistics of replicated server messages, failed connections and dropped connections
 - Replication server details
