

Creating A Zone

Overview

This section will explain to you how to create a Zone and also what each of the Zone properties represents.

Setting up a zone's parameters allows TapeTrack to give you the specific zone, shelf and slot address to efficiently store and pick volumes.

Creating A Zone

From the menu click Administration→Zone Administration.

Right click in the main window and select Add.

In the Identity tab add:

- Zone ID
- Zone description
- Total number of slots
- Number of slots per row
- Customer filter (optional)

New Zone [X]

Identity

Attributes

Index:

☒ Active

ID:

Description:

Slot Range: to =

Slots/Level:

Customer Filter:

Click Save.

Once created zones can be [applied to a repository](#)

Slotting

[Slotting](#) can be done manually or automatically.
