Zone Administration

Zone Administration gives you access to the zone administration window, from which you can add, remove or alter current zones as well as view slots currently in use through the zone usage tab.

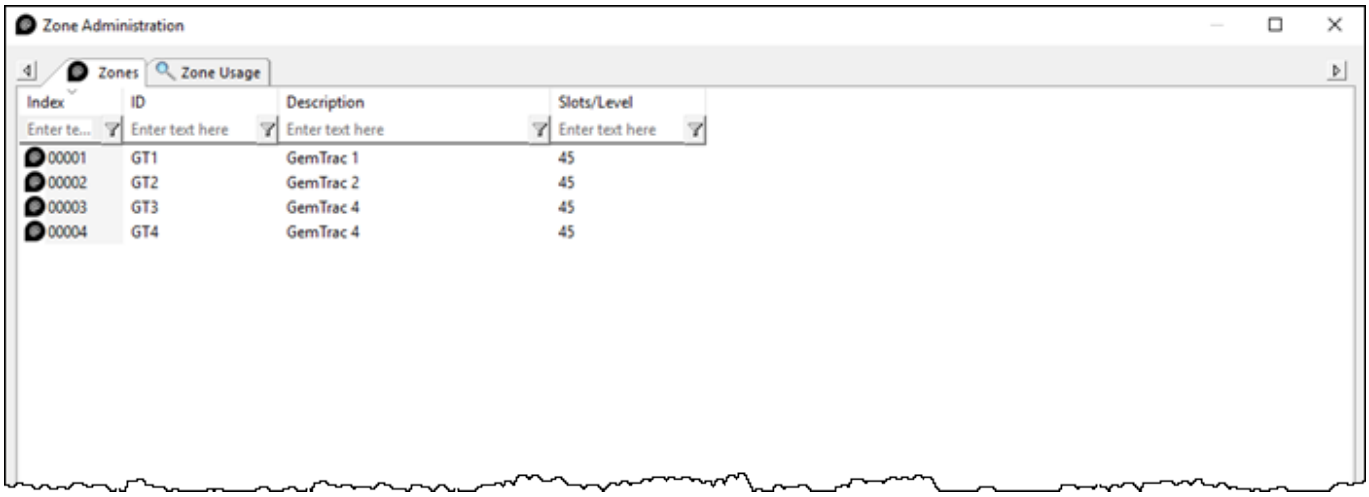

To access the Zone Administration window, from the main menu, select `Administration` → `Zone Administration`.

Only users with tapemaster rights have access to the Administrative menu.

Zone Tab

The Zone tab displays current zones index, zone ID's, descriptions and number of slots per level.

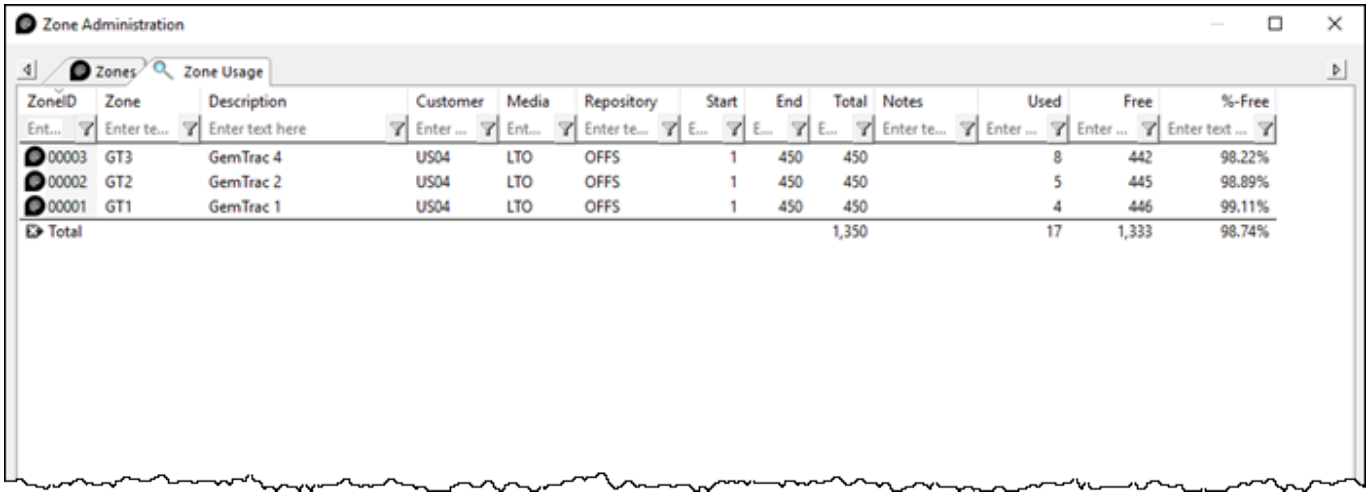

Zone Tab Right Click Options

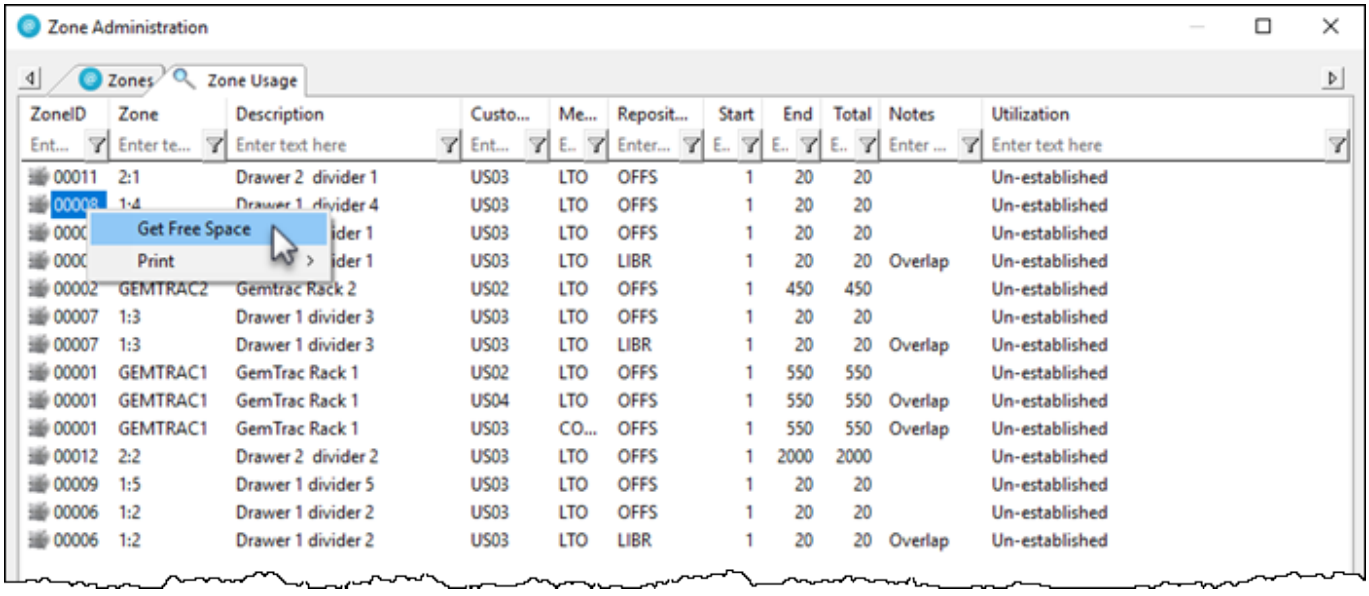

- **Add**: Adds a new zone.
- **Disable**: Disables the use of the zone.
- **Edit**
  - **Paste (Using Selected Attributes)**
- **Enable**: Enables the use of the zone.
- **Print**
  - **All**: Prints all zones and associated information.
  - **Labels**: Prints labels for use when scanning volumes into zones.
  - **Selected**: Prints selected zones and associated information.
- **Properties**: Opens **Edit Zone** window to edit zone properties and view zone usage information.

Zone Usage Tab

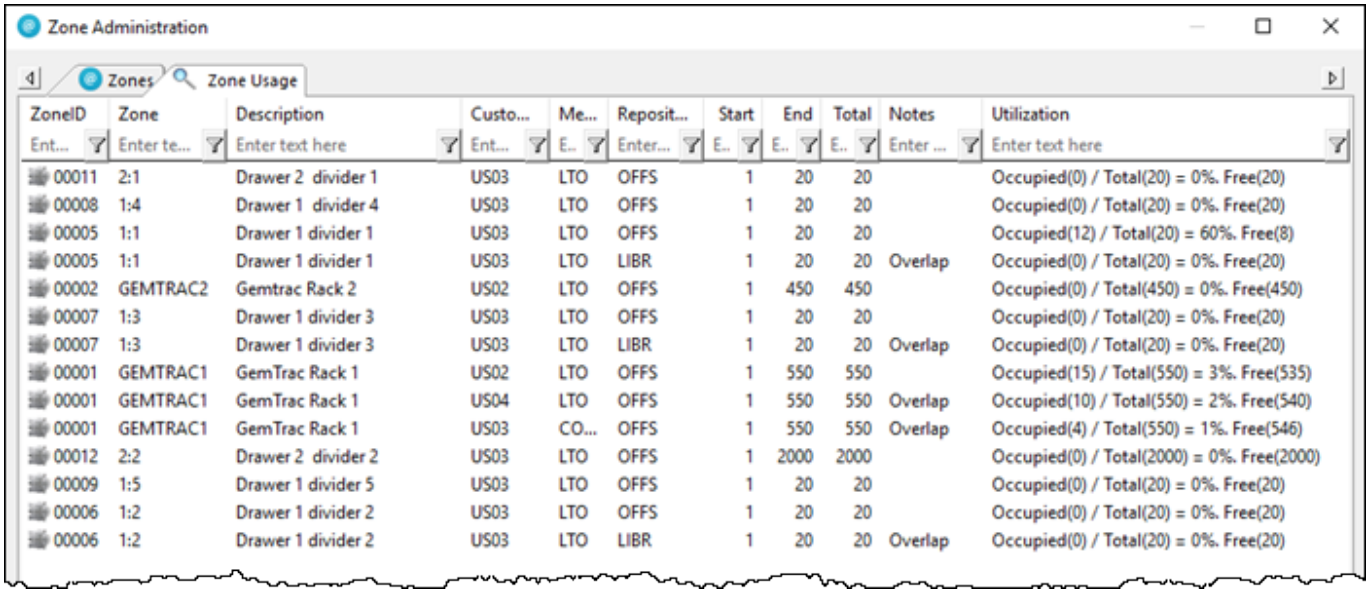

The Zone Usage tab displays the current zone index, zones ID's, Descriptions, assigned Customer and Media and Repository ID's, start and end and total slot numbers, notes and utilization figures of all zones mapped to customers repositories.

When first opened the utilization column will display **Un-established**, this is a feature to allow a quick load time of the rest of the zone data. If the utilization numbers are required, right click any zone and select `Get free space`.

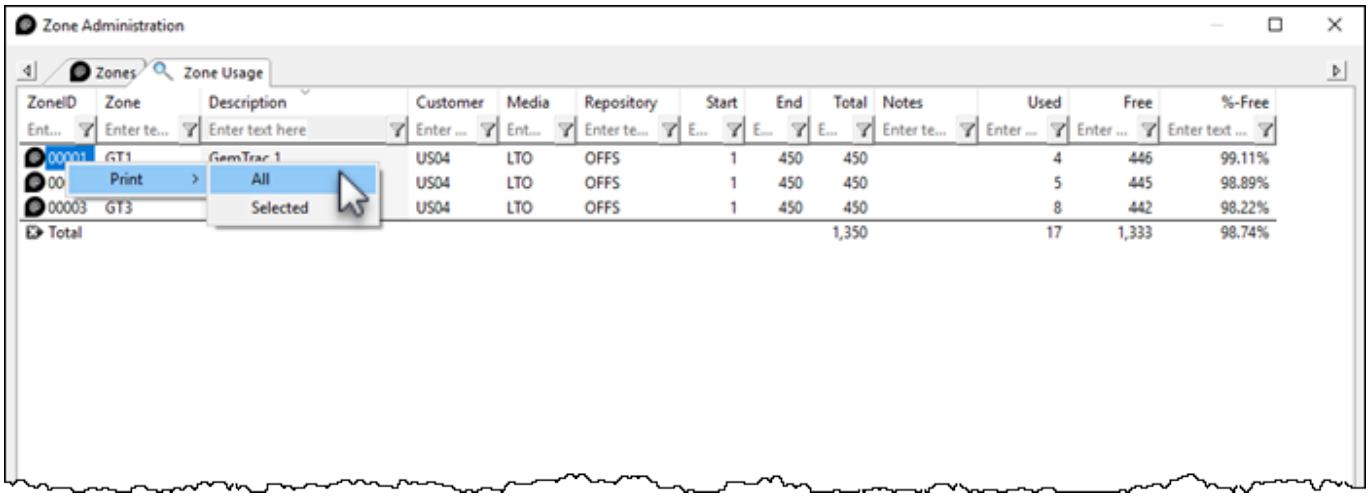

The utilization column will now display the number of slots occupied, total slots allocated, percentage of slots used and the number of slots free (or unoccupied).

To export to a file press `Ctrl` → e.

Select `Yes` on the Selection Required window.

{:master:tapemaster_tools_volume_export_select.png}}

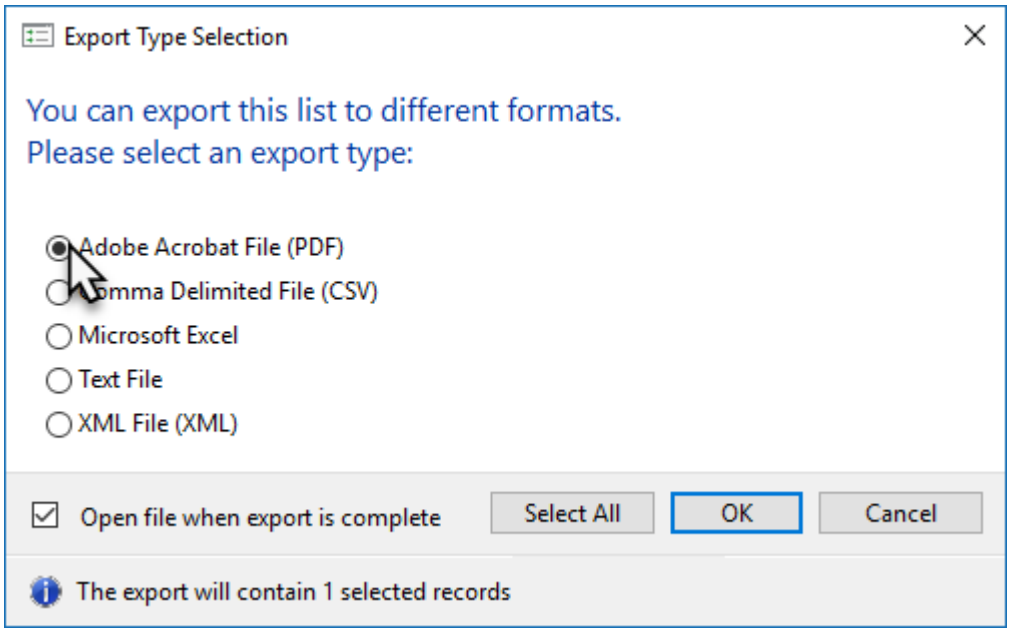

Then select the output format from:

- Comma Delimited File (CSV)
- Microsoft Excel
- Text file

- XML File

Click `Select All` if you want to select all volumes for export. By default the **Open file when export is complete** is checked, uncheck if you do not want the file to open on export.

Click OK to export or `Cancel` to abort the process.

Click the X in the top right corner to exit.
