Modify Assign Container

Assign New Container/No Container is used to add or remove volumes from container assignment.

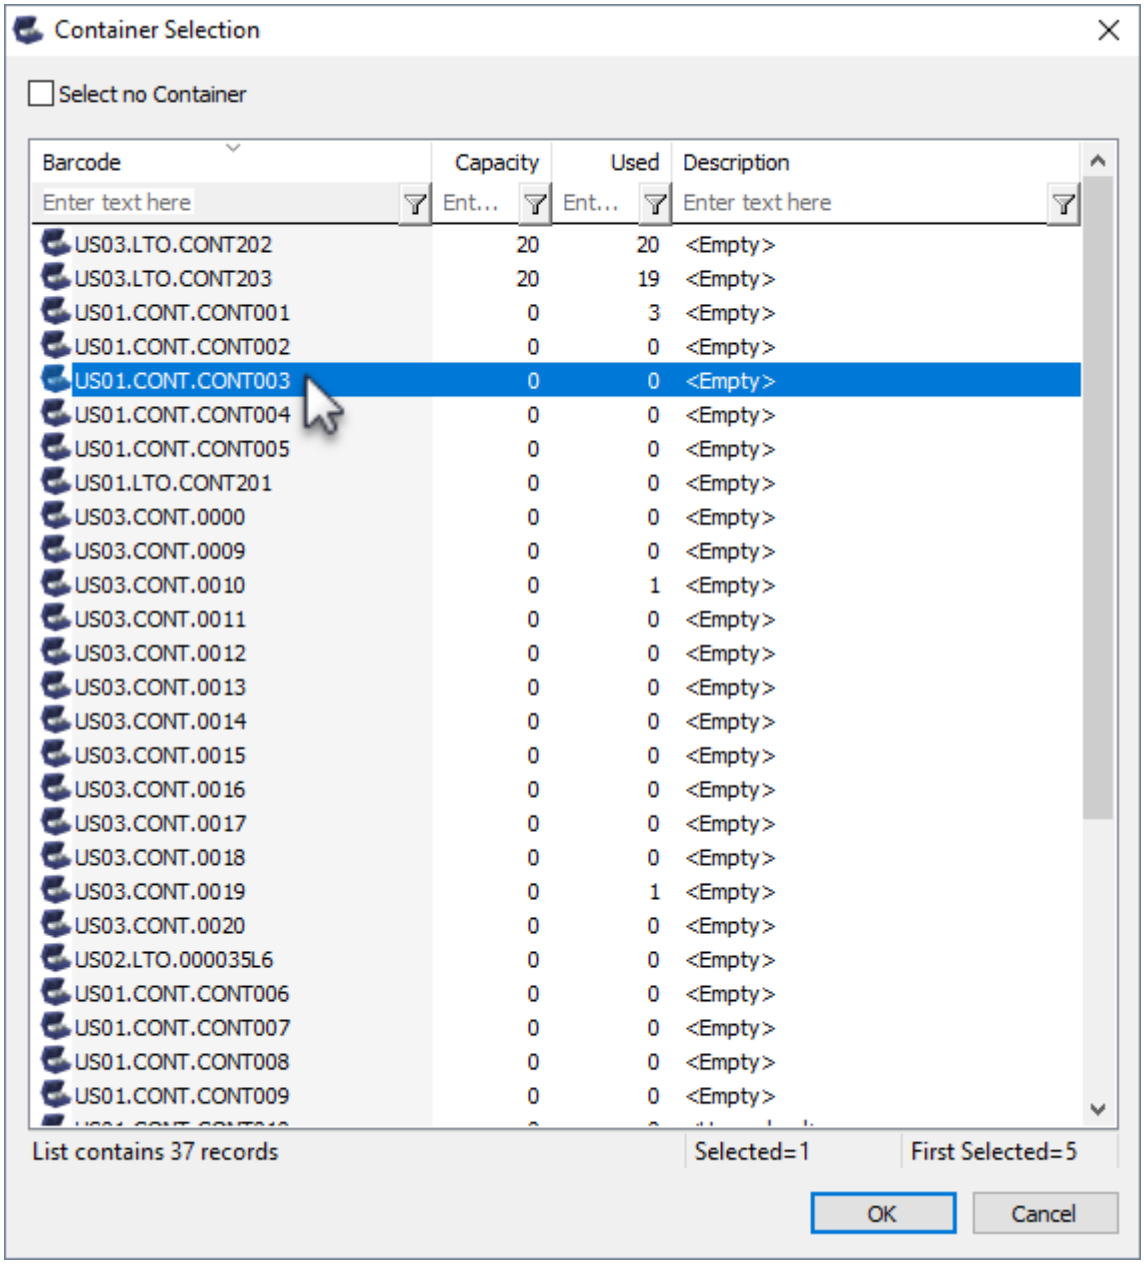

Add Volumes To Container

Select a volume or range of volumes (shift + click and or control + click) from the inventory window to assign to a container.

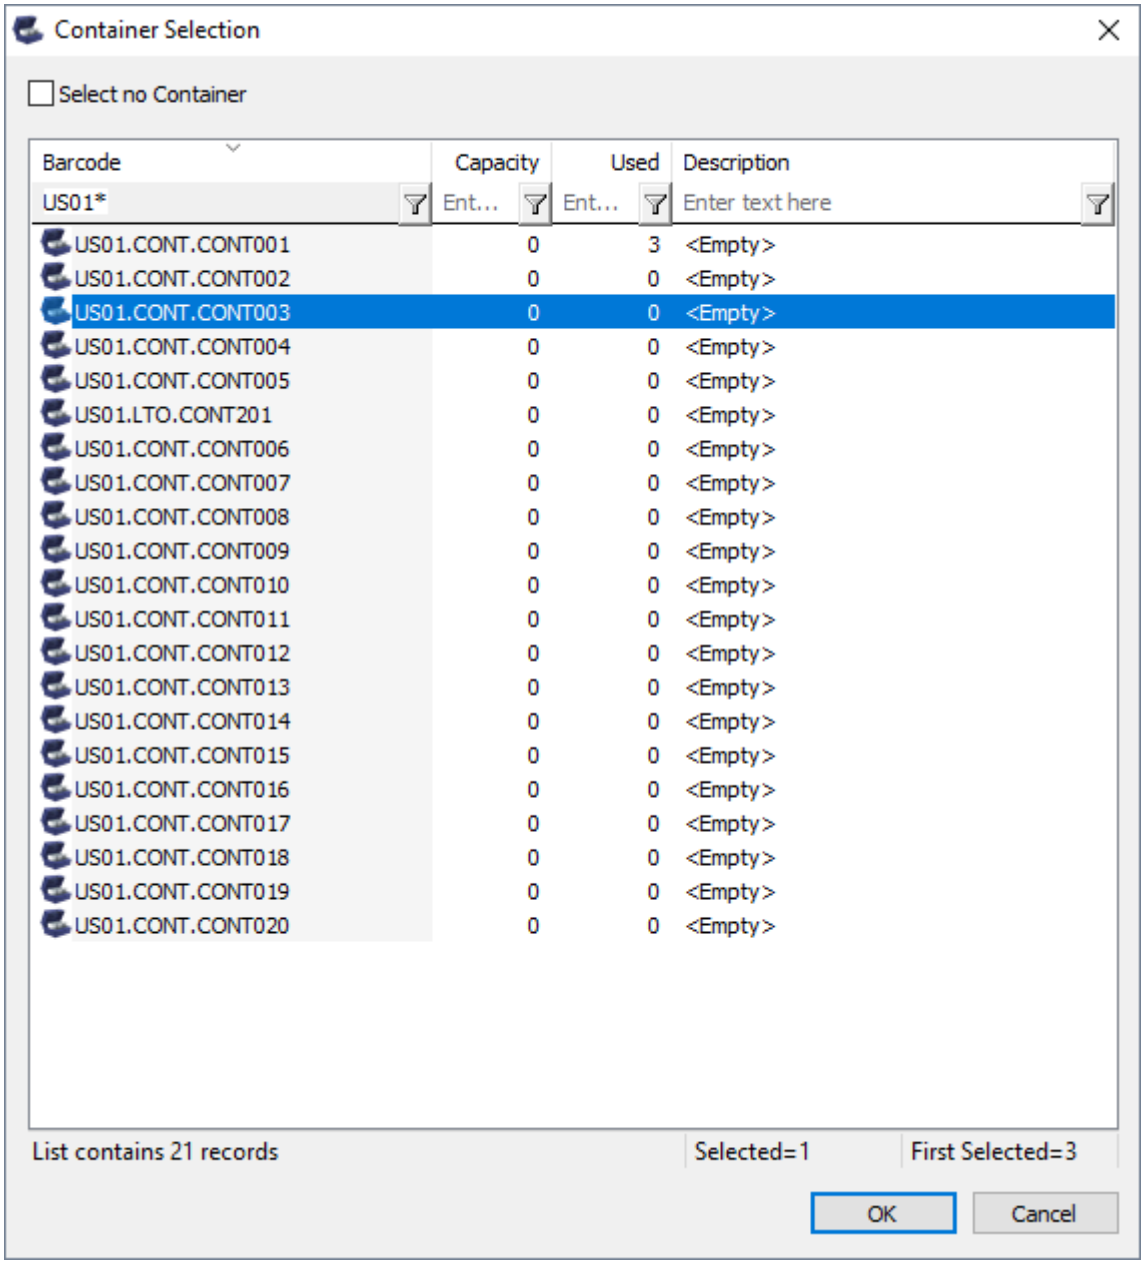

Right Click highlighted volume/s and select `Special Operations→Modify→Assign to new/no container`.

Select the required container from the displayed list and click OK.

If you have a large quantity of containers for multiple customers, filtering results on barcode values (e.g. **US01*** for all US01 containers) can simplify the selection by removing unwanted containers from the display.

Other filters, container capacity, container content quantity (ie. use 0 for empty containers) or description can also be used to narrow results for container selection.

Click OK to save results and exit back to the inventory window.
