Modify Assign Container

Assign New Container/No Container is used to add or remove volumes from container assignment.

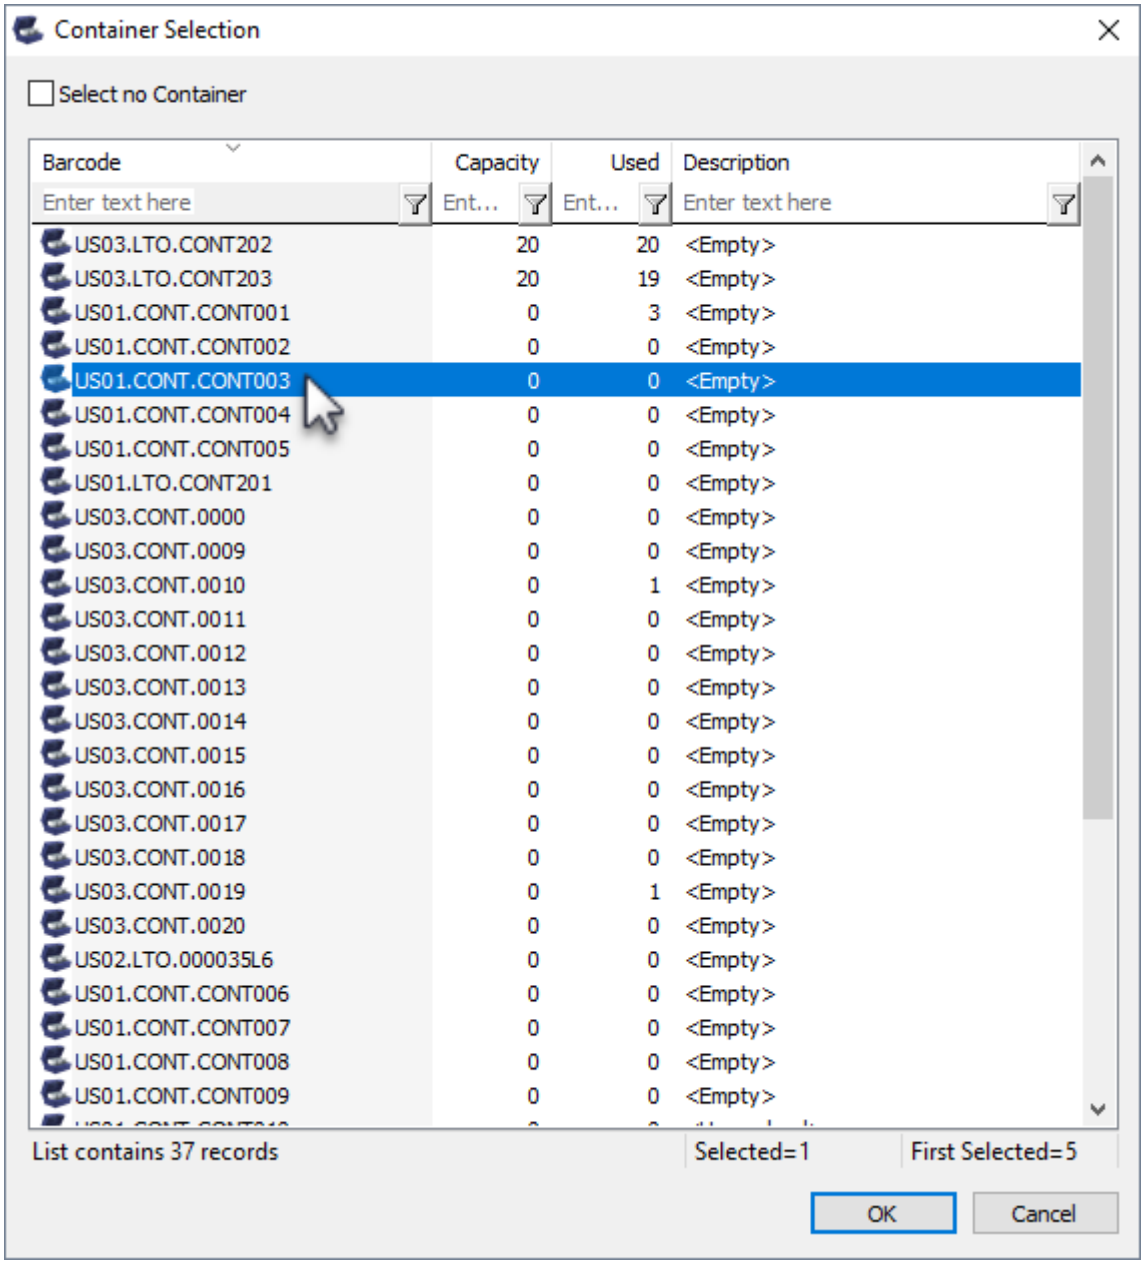

Add Volumes To Container

Select a volume or range of volumes (shift + click and or control + click) from the inventory window to assign to a container.

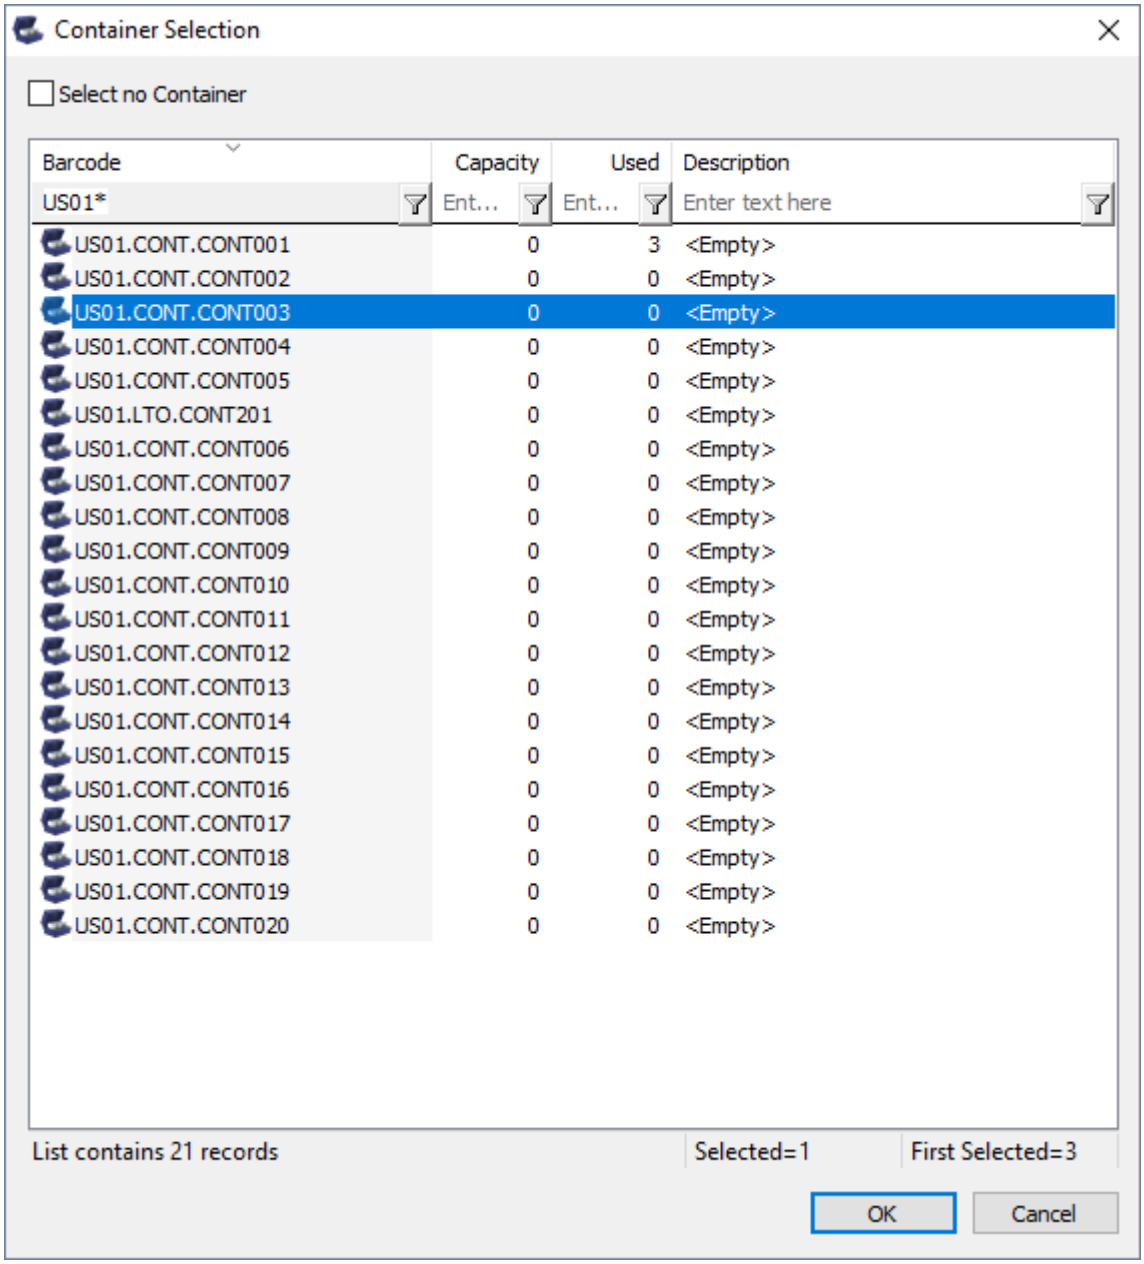

Right Click highlighted volume/s and select `Special Operations→Modify→Assign to new/no container`.

Select the required container from the displayed list and click OK.

If you have a large quantity of containers for multiple customers, filtering results on barcode values (e.g. **US01*** for all US01 containers) can simplify the selection by removing unwanted containers from the display.

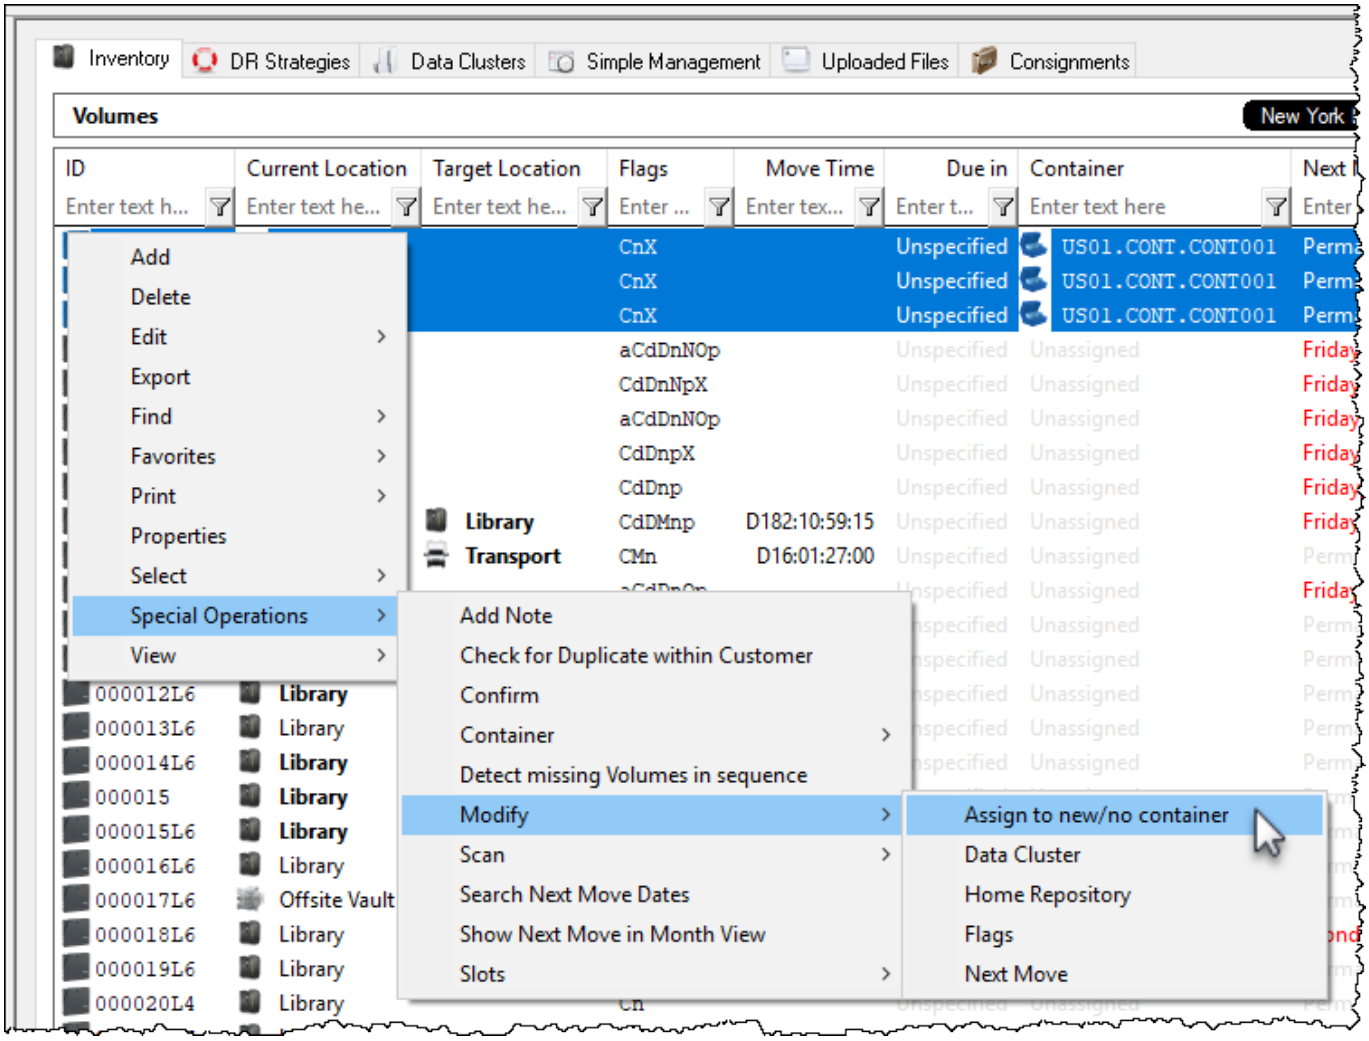

Other filters, container capacity, container content quantity (ie. use 0 for empty containers) or description can also be used to narrow results for container selection.

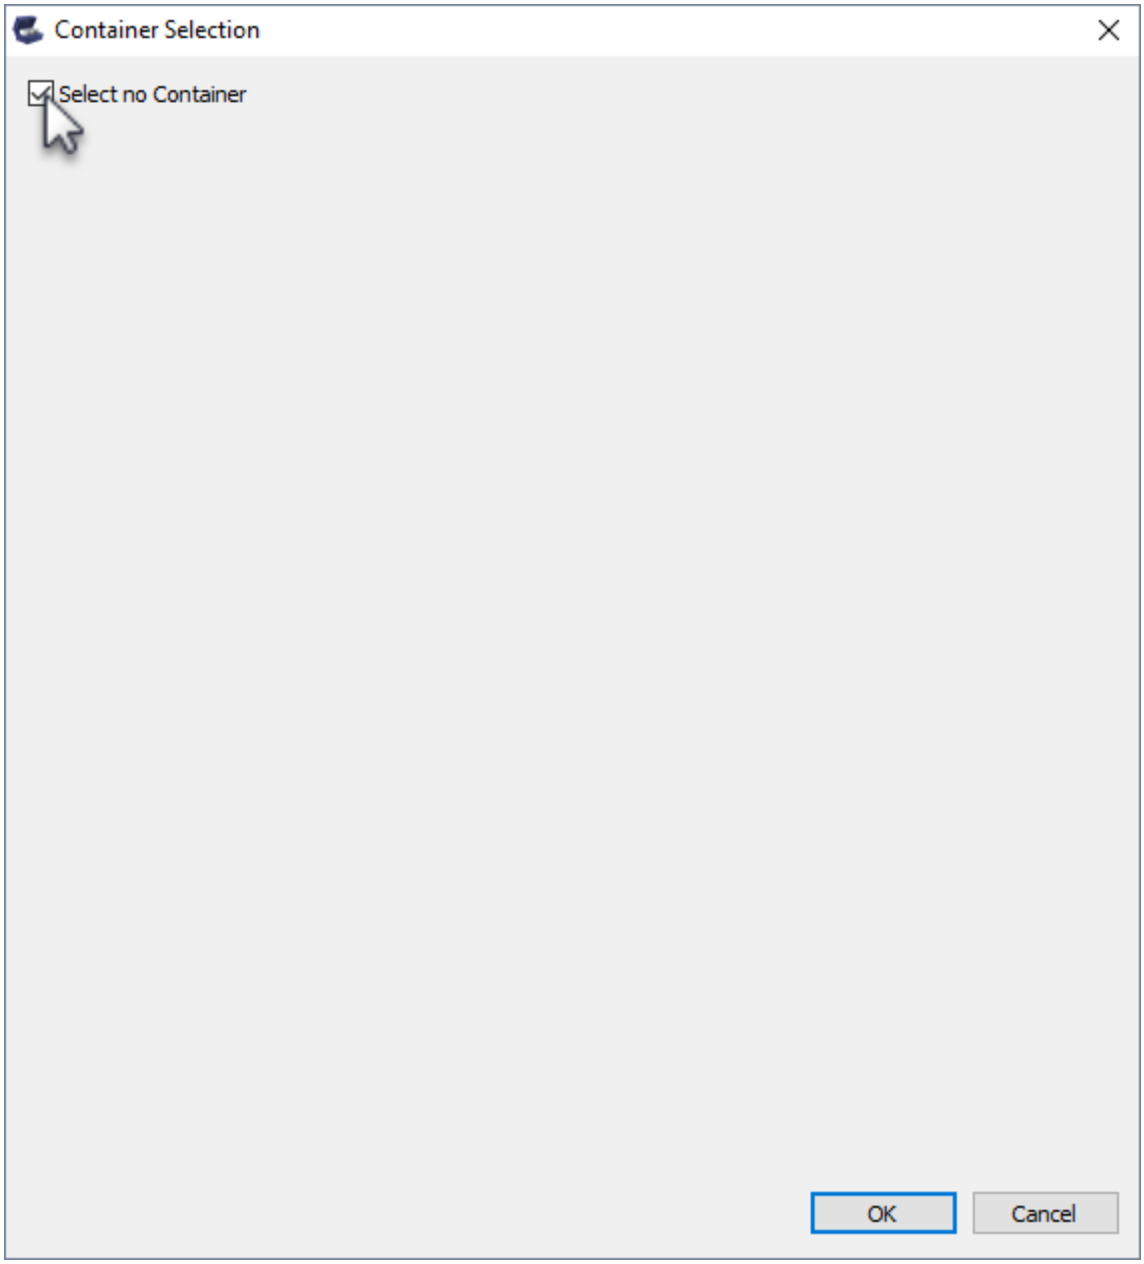

Click OK to save results and exit back to the inventory window.

Remove Volumes From Container

Select a volume or range of volumes (shift + click and or control + click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

From the **Container Selection** window check the `Select No Container` checkbox at the top left. This will remove the displayed containers.

Click OK to remove the volumes from the assigned containers and exit back to the inventory window.
