Adding and Deleting Customers

A Customer is an owner of Volumes. This page details how to Add or Delete Customers.

Add Customer

To add a Customer, right- lick on the Server Node of the Customer Tree and select “Add Customer”.

This will launch a modified version of the Customer Properties Window. The first tab on the Add Customer window is the Identity tab. The Identity tab requires the input of a Customer ID and a Customer Description. Both of these items must follow the syntax rules.

TapeMaster_Add_Customer.png The Contact Details tab provides a location for contact details for that customer.

TapeMaster_Add_Customer2.png The Options tab can be utilized to set specific details about a customer. These details are accessible at any point by right-clicking the customer and selecting Properties. For details on these options, see the Customer Properties Window.

TapeMaster_Add_Customer3.png Once you click “Save”, TapeMaster will open a prompt asking if you'd like to add some media. If selected yes, then TapeMaster will prompt you to the `Add Media Types for new Customer` window. Create relevant Media Type by changing the `Create` option from `False` to `True` Delete Customer

To delete a customer, right-click on the Customer in the Customer Tree and select Delete Customer. TapeMaster_DeleteC.png

Note: A customer may only be deleted when it does not contain Media Types, Repositories, or Volumes.
