Customer Tree - Attribute View

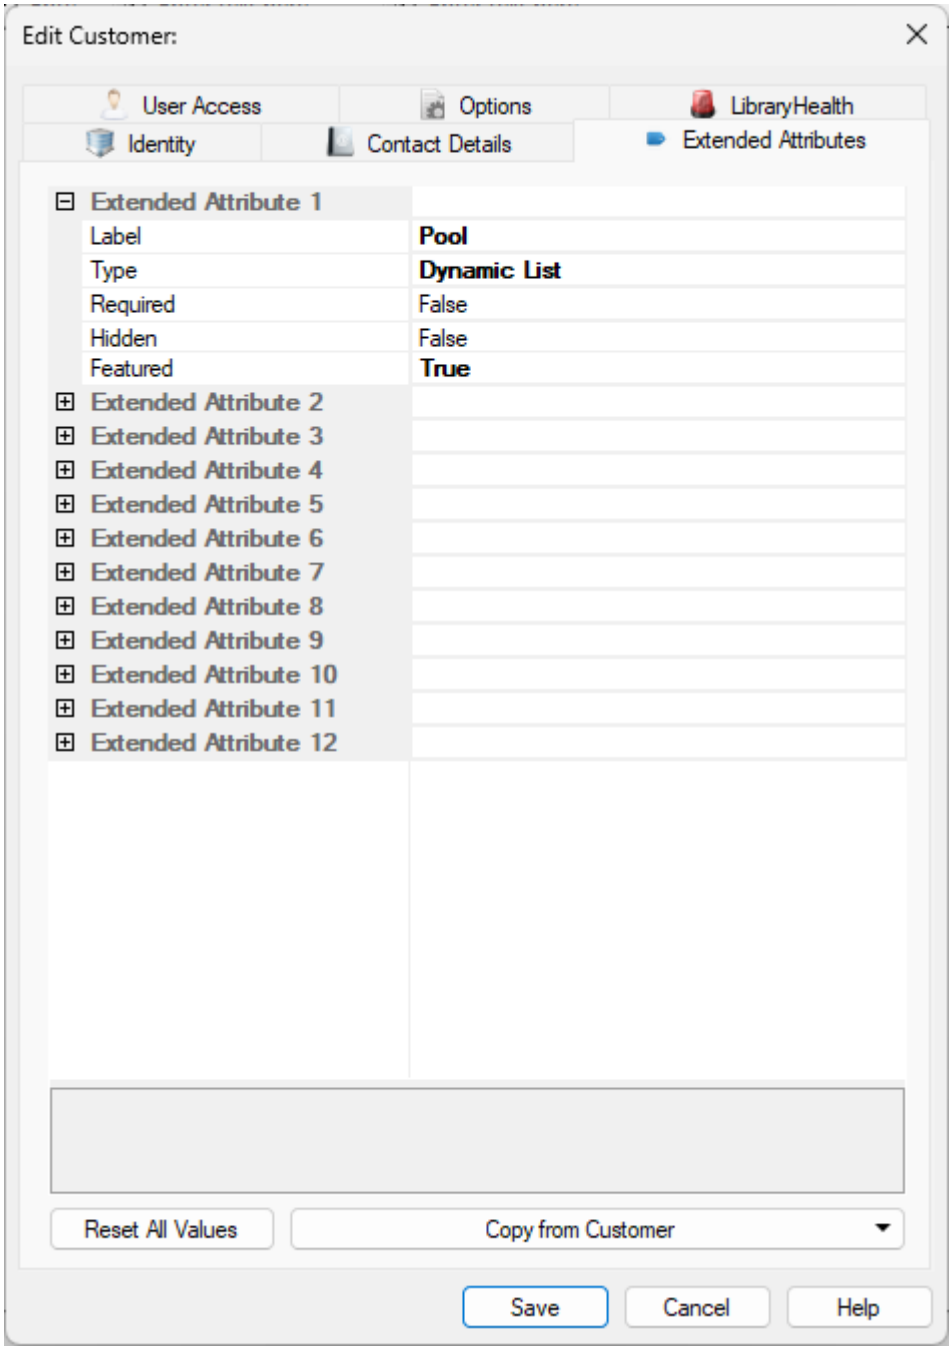

In the default media type view, the information is displayed in the hierarchy of Owner, Customer and Media types. Attribute view differs in the information is displayed in the hierarchy Owner, Customer, featured attribute/s separated into matching or unique values, media type and Repository or location.

This allows you to quickly identify and display of an attribute category and value.

Prerequisites

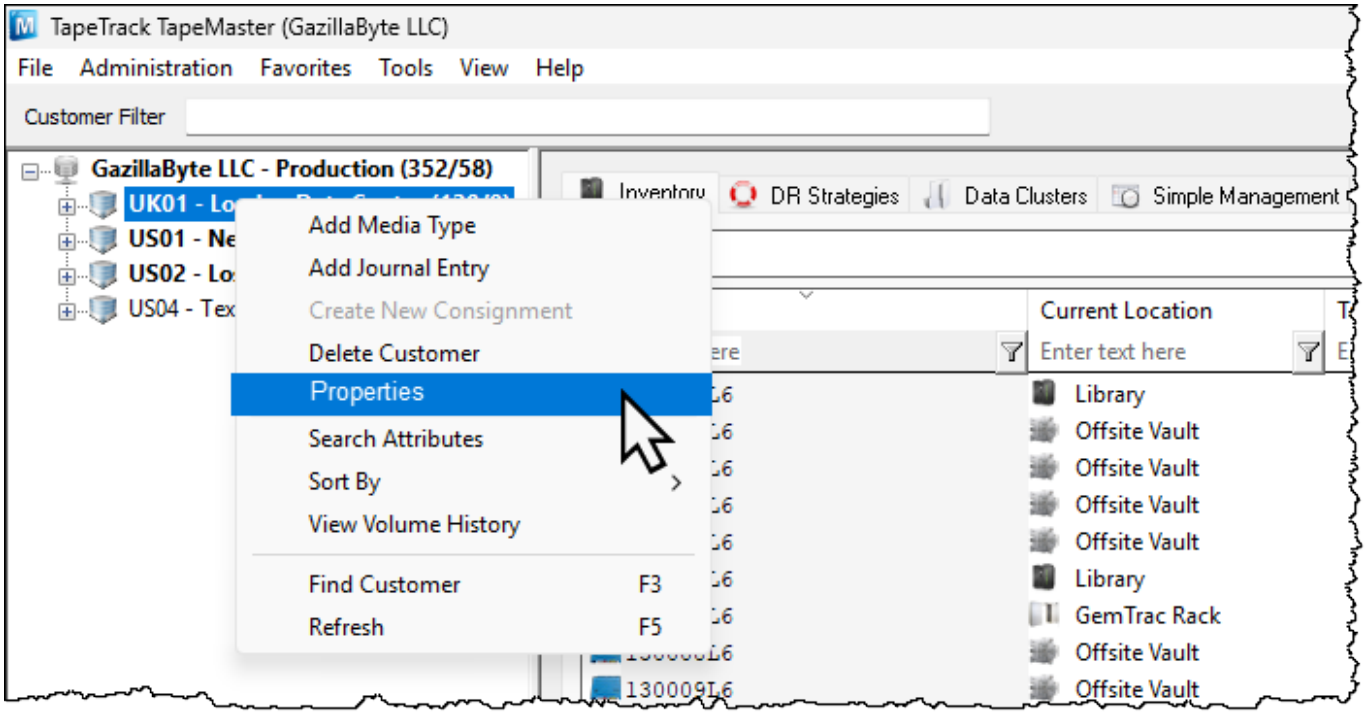

The Customer must have a media type, at least one extended attribute and at least one extended attribute set to featured (true).

Adding an extended attribute

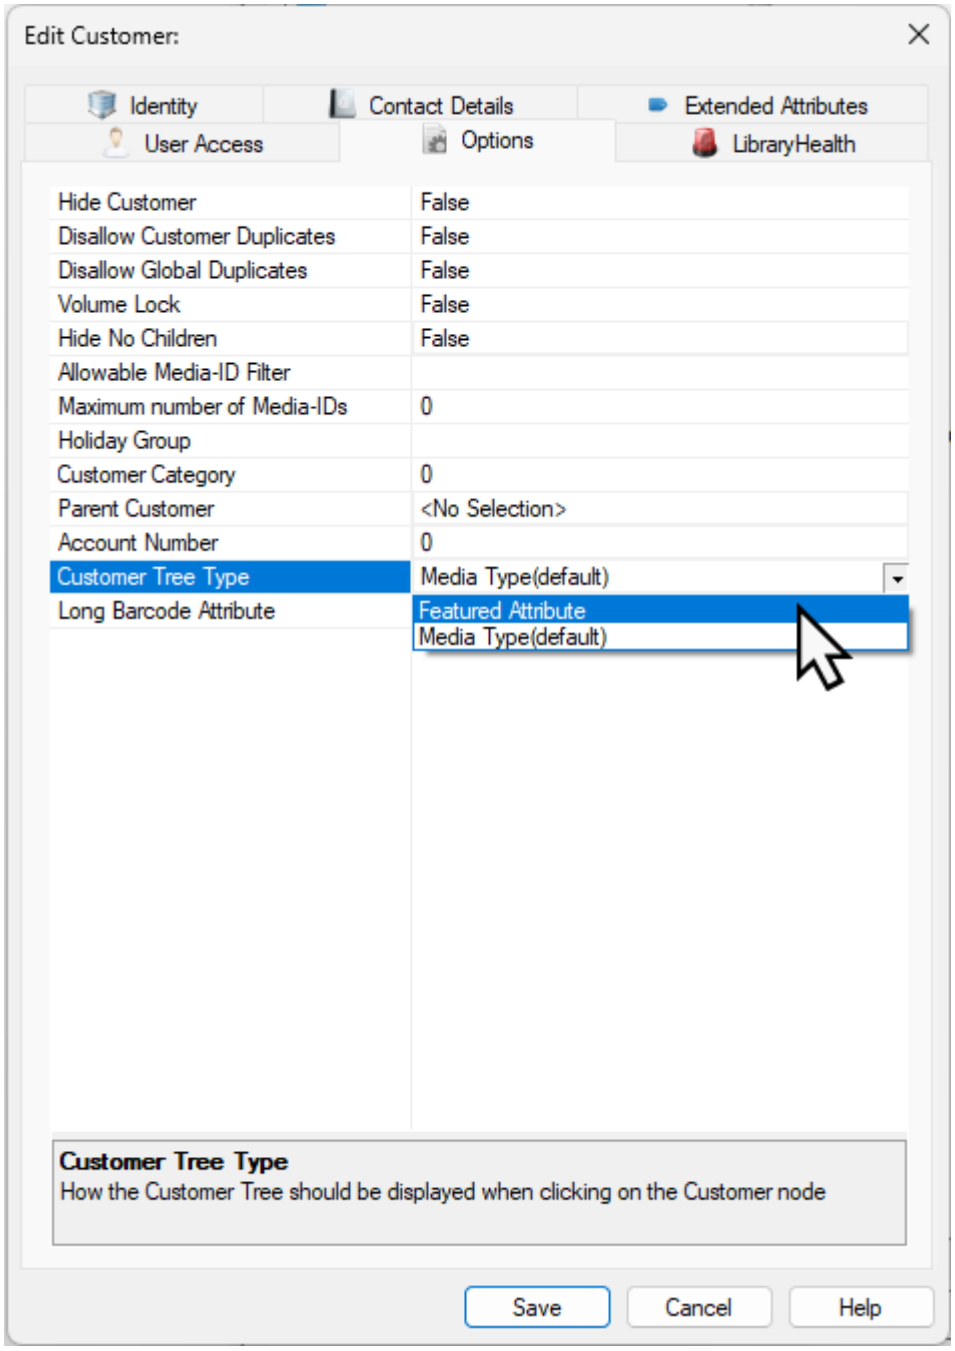

Enabling Attribute View

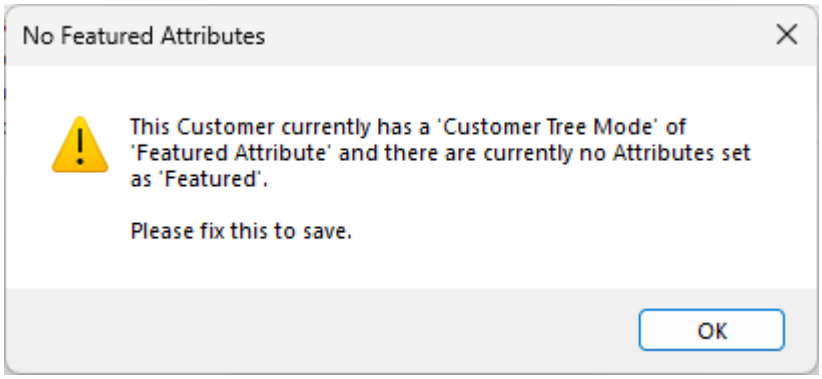

Right click on the required Customer-ID, select `Properties`.

Select the `Options` tab and set `Customer Tree Type` to `Featured Attribute`. click Save to switch to Featured Attribute View.

If you haven't set at least one extended attributed as featured, you will encounter the error `No Featured Attributes`. Select the `Extended Attributes` tab and set the required attribute/s to `featured` equal to `true`.

master, customer, attribute
