Downloading the software

Download your software to match your selected operating system from TapeTrack Downloads.

You will need to download and install at a minimum **TapeTrack Framework Server** this will also install **TapeTrack TapeMaster** and the **Server Utilities**.

You will also find download links for TapeTrack Lite, Checkpoint, Sync agents and SecureSync agent if required.

If your **Framework Server** is installed on a remote or virtual server you will need to install **TapeTrack TapeMaster** and **Server Utilities** on your local machine.

A download and installation video can be viewed here
