

DR Strategies Tab

A DR Strategy (Disaster Recovery Strategy) is a list of Volumes necessary to restore a system back to a given time in the event of catastrophic system failure. When a DR Strategy is enacted, the volumes listed will be automatically recalled to enable a quick and efficient restore of data.

Right Click Options

- **Add:** Add new strategy.
- **Delete:** Delete current strategy.
- **Execute Strategy:** Enact or execute strategy, recalling listed volumes.
- **Modify**
 - **Depreciate:** Depreciate or inactivate strategy
 - **Undepreciate:** Undepreciate or reactivate strategy
- **Properties:** View selected strategy properties.
