

# DR Strategies Tab

A DR Strategy (Disaster Recovery Strategy) is a list of Volumes necessary to restore a system back to a given time in the event of catastrophic system failure. When a DR Strategy is enacted, the volumes listed will be automatically recalled to enable a timely restoration of data.

## Right Click Options

- **Add**: Add new strategy.
- **Delete**: Delete current strategy.
- **Execute Strategy**: Enact or execute strategy, recalling listed volumes.
- **Modify**
  - **Depreciate**: Depreciate or inactivate strategy.
  - **Undepreciate**: Undepreciate or reactivate strategy.
- **Properties**: Launches the Edit DR Strategy window.
