Favorite Flag

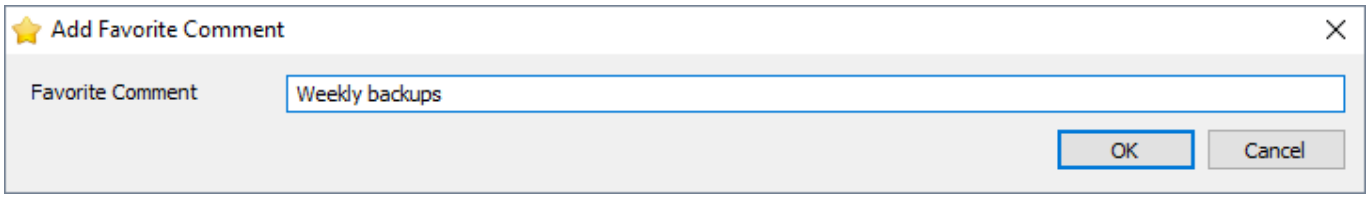

Volumes that need to be referenced on a regular basis, or need to be observed for any specific reason can be marked as a favorite. This allows easy identification and quick filtering from other volumes.

Adding a Favorite Volume

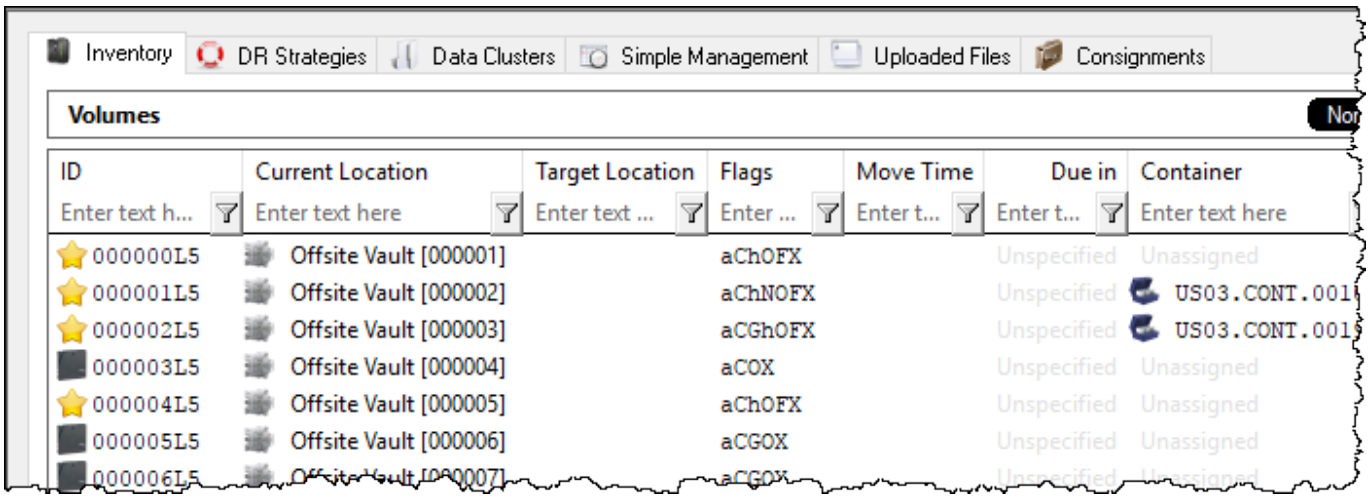

Select a volume, or a range of volumes, to be marked as a favorite. Right-click highlighted volume/s and select `Favorites` → `Set`.

Insert comments describing why the volumes are being marked as favorites and click OK.

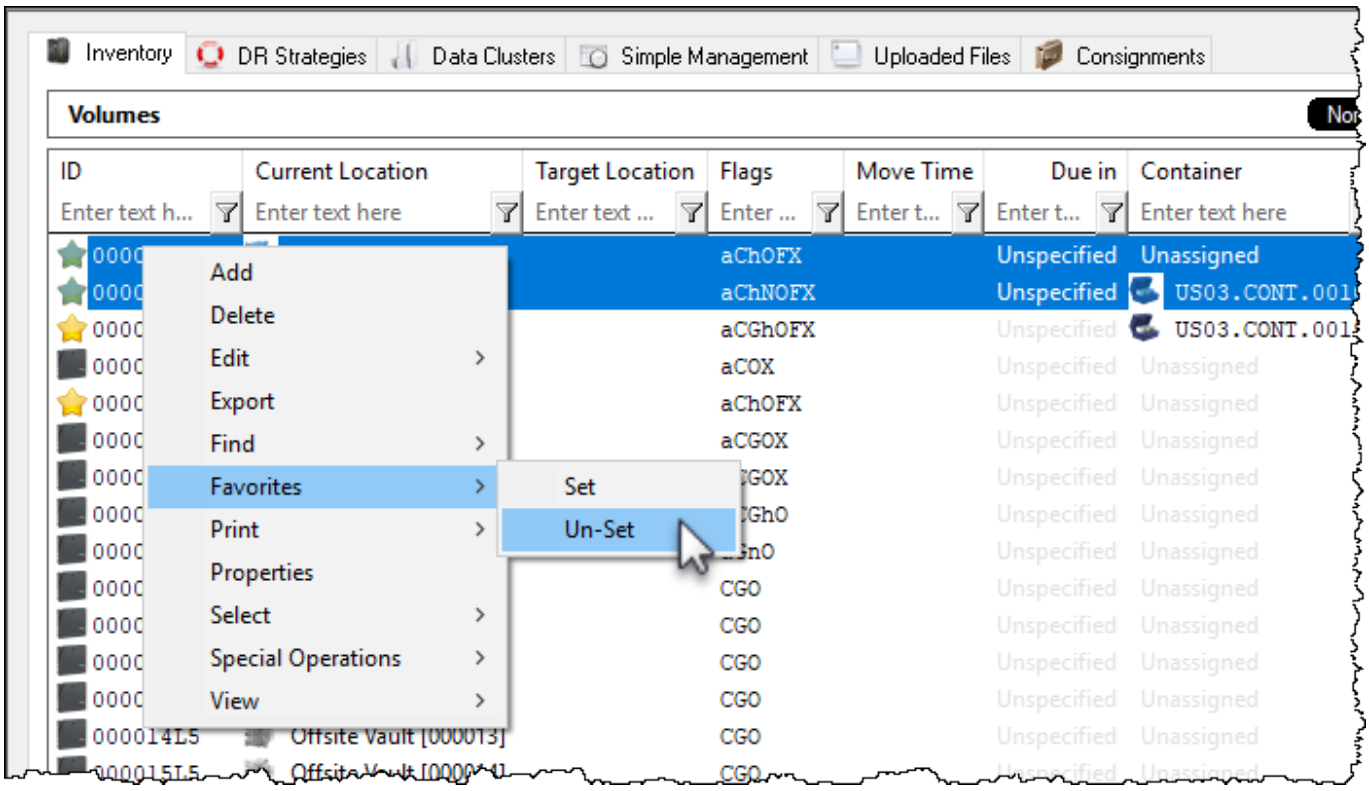

This will add an F flag to the volume/s and change the icon to a star.

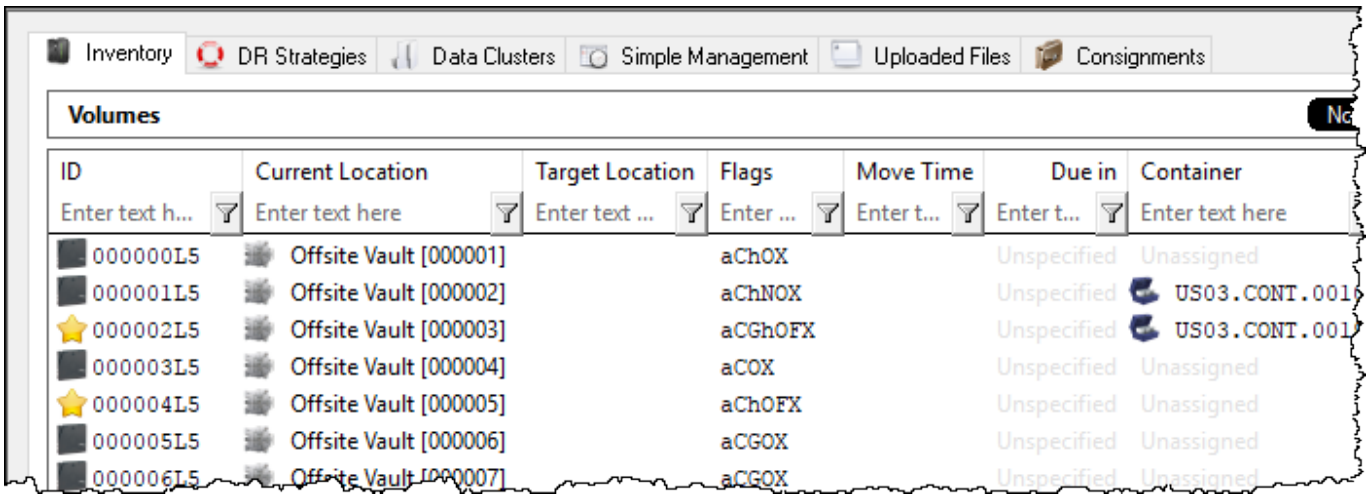

Removing a Favorite Volume

Select a volume, or a range of volumes, to be removed as a favorite. Right-click highlighted volume/s and select `Favorites` → `Un-Set`.

This will remove the F flag from the volume/s and change the icon from a star to its original icon, either a volume or Container.

Filtering Favorites

Adding an F in the Flags filter field will display any Volumes marked as Favorite.

Pressing Ctrl+F will clear all filters and refresh the Volume display.

Listing Favorites

From the Main Menu, click `Favorites` > `List`.

From the Favorite list window you can right click any Volume and select Remove to unset the favorite flag or click Ctrl+E to open the export to file selection the inventory information of the Volumes.

Sample export:

```
             System: TapeTrack
 Report Description: Volume List
       Report Notes: New York Data Center - LTO Cartridge
