

Library Health

The Library Health field in the [Volume List Properties Window](#) displays a score out of 100, measuring the health of the selected [Customer's Media Type](#).

The screenshot shows the 'Volume List Properties Window' with the 'Library Health' section expanded. The 'Score' is 20, and the 'Health' bar is partially red. The 'Description' is 'Critical'. The 'Problems' section lists several issues with negative scores. The 'Library Statistics' section shows counts for 'Library' and 'Offsite Vault' volumes. The 'Volumes' table on the right lists individual volumes with their IDs, current locations, and target locations.

ID	Current Location	Target Location
000000L6	Library	
000001L6	Library	
000002L6	Library	
000003L6	Offsite Vault	
000004L6	Library	
000005L6	Offsite Vault	
000006L6	Library	
000007L6	Library	
000008L6	Offsite Vault	Library
000009L6	Library	
000010L6	Offsite Vault	
000011L6	Library	Offsite V
000012L6	Library	
000013L6	Library	
000014L6	Library	
000015	Library	
000015L6	Library	
000016L6	Library	
000017L6	Library	
000018L6	Library	
000019L6	Library	
000020L4	Library	
000020L6	Library	
000021L4	Library	
000021L6	Library	
000022L6	Library	
000023L6	Library	
000024L6	Library	
000025L6	Library	
000026L6	Library	

Deductions

The following list of items will deduct from a perfect Library Health Score:

- One or more Volumes have received an overdue [Flag](#) for being overdue at their current [Repository](#).
- There are no [Volumes](#) in a [Repository](#) that is set to off-site in the [Options Tab](#) of the [Repository](#)

[Properties Window](#) or it has been a number of days since [Volumes](#) have been sent to an off-site [Repository](#).

- Disaster Recovery Strategies are either non-existent or have not been created recently.
- Disaster Recovery Strategies have errors, meaning that [Volumes](#) necessary for a restore are not in a [Repository](#) that is set to off-site in the [Options Tab](#) of the [Repository Properties Window](#).
- [Volumes](#) have received an audit [Flag](#) due to a failed physical audit.
- A sync with a Backup System has never been initiated through TapeTrack Sync or has not been initiated in several days.

Excluding Media

Media types can be excluded from health check statistics through [Media properties option tab](#)
