

Manually Moving Volumes

Moving Volumes Manually

While manually moving volumes is, essentially, the simplest way of moving a volume from one repository to another the method best suited to small numbers of volumes or when the volume list is supplied in email or text file.

Drag and Drop

Drag and Drop selected volumes is a quick method for moving small groups of easily identified volumes. Simply select the volume (or range of volumes by Ctrl + click and/or Shift + click) and drag them to the required target repository and release the mouse.

Volumes can also be selected using the [scan to select](#) function.

The screenshot shows the TapeTrack web interface. At the top, there are tabs for 'Inventory', 'DR Strategies', 'Data Clusters', 'Simple Management', and 'Uploaded Files'. The 'Inventory' tab is active, and the 'Volumes' section is displayed. A search bar at the top right of the Volumes section shows 'ID[US04] LTO Cartridge'. Below this is a table with 11 records. The first four records are highlighted in blue, indicating they are selected. The table has columns for ID, Current Location, Target Location, Flags, Move Time, Due in, Container, and Next Move. Below the table, it says 'List contains 11 records'. Under the 'Repositories' section, there are four icons: 'Initial Repository' (a box), 'Library' (a server rack), 'Next Repository' (a play button), and 'Home Repository' (a house). A mouse cursor is hovering over the 'Next Repository' icon. At the bottom of the interface, there is a status bar showing 'Connection 127.0.0.1 uses AES 256 bit encryption' and a 'TapeTrack' logo.

ID	Current Location	Target Location	Flags	Move Time	Due in	Container	Next Move
0000001	Library		CnN		Unspecified	Unassigned	Permanent
0000002	Library		CnN		Unspecified	Unassigned	Permanent
0000003	Library		anNOZ		Unspecified	Unassigned	Permanent
0000004	Library		CnNZ		Unspecified	Unassigned	Permanent
0000005	Library		CnNZ		Unspecified	Unassigned	Permanent
0000006	Offsite Vault		CnNOtXZ		Unspecified	Unassigned	Permanent
0000007	Offsite Vault		CnNOtXZ		Unspecified	Unassigned	Permanent
0000008	Offsite Vault		CnNOtX		Unspecified	Unassigned	Permanent
0000009	Offsite Vault		CnNOtX		Unspecified	Unassigned	Permanent
0000010	Offsite Vault		CnNOtX		Unspecified	Unassigned	Permanent
0000011	Offsite Vault		CnOt		Unspecified	Unassigned	Permanent

The selected volumes will now have a target repository of the repository you dropped the volume/s on.

Copy and Paste

Copy the volume ID's to your clipboard from text file, csv, email or other format.

Right click the repository you want the volumes to move to and select Scan → To Move.

From the scan in window click the **Clipboard** icon to paste in the volume ID's.

Close the scan in window by clicking th X at the top right.

The volumes will now have a target repository displayed.
