

Volume Refresh Clock

The Volume Refresh Clock displays a timer in the top right of the Inventory window. This timer shows how long since the Inventory data was refreshed.

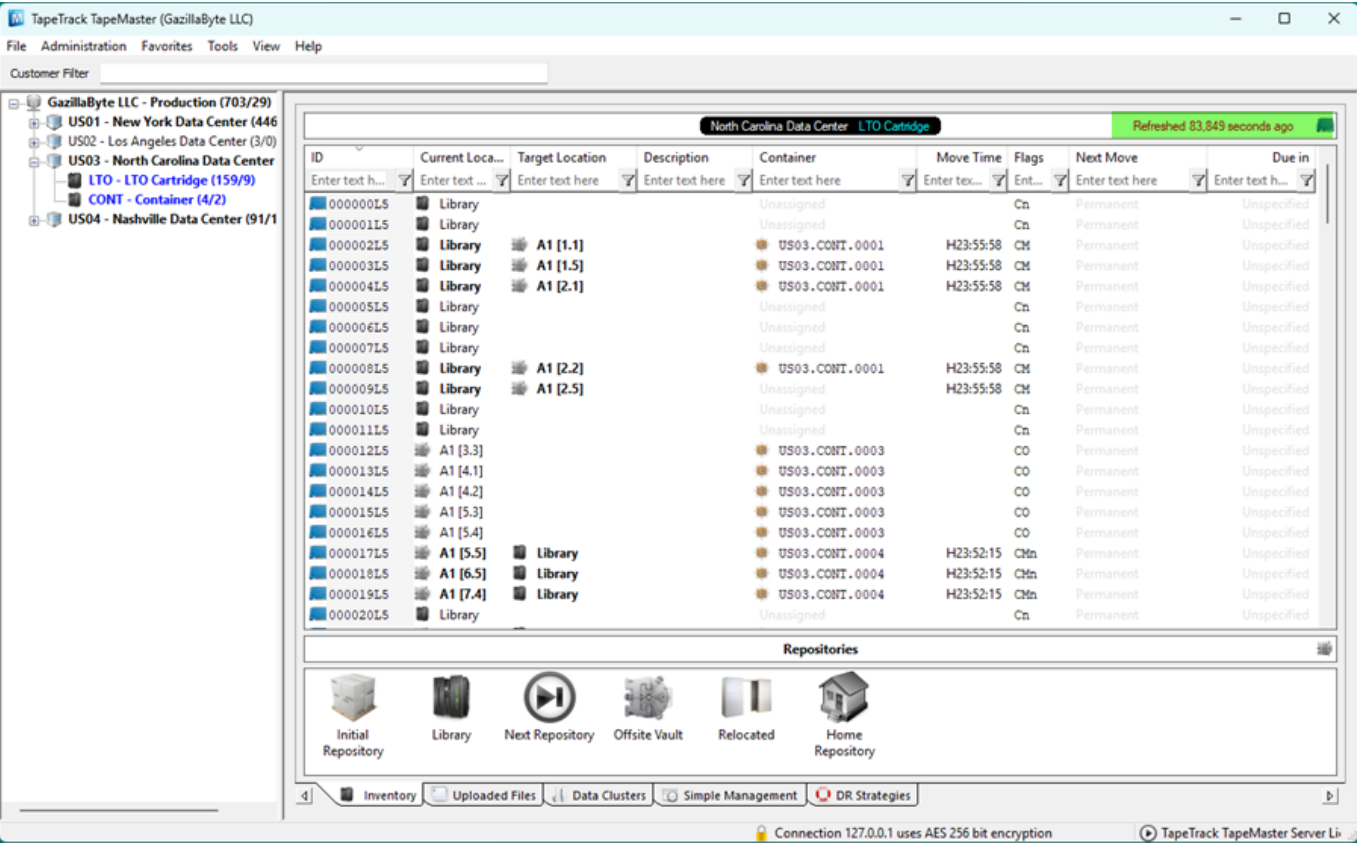

Display the Volume Refresh Clock

Open the TapeMaster preferences by clicking File > Preferences.

Set the field Volume Refresh Clock to True and click OK to commit the data and close the window.

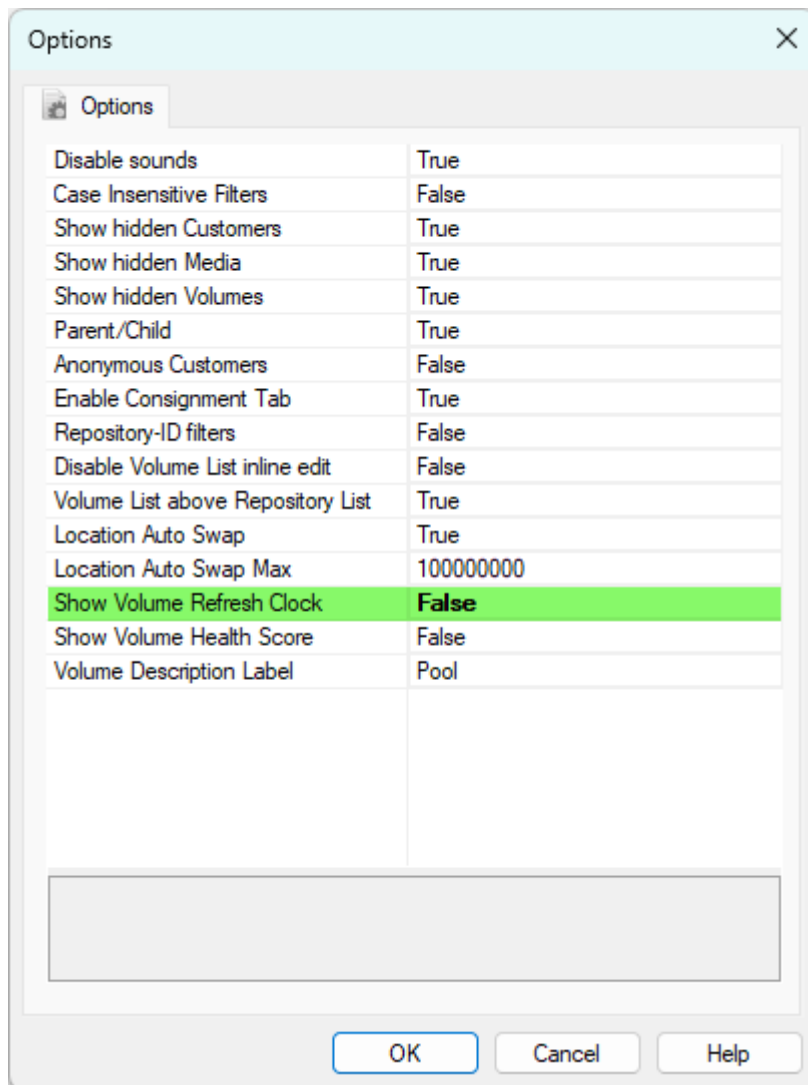

The timer is now displayed at the top right of the Inventory window.

Remove the Volume Refresh Clock

Open the TapeMaster preferences by clicking File > Preferences.

Set the field Volume Refresh Clock to False and click OK to commit the data and close the window.

Close and restart TapeMaster to effect the changes.
