

Remove Volumes From Container

Remove Volumes Via The Volume Media Inventory Window

Select a **Volume** or range of **Volumes** (Shift+Click and or Ctrl+Click) from the Inventory window to remove from Container/s. **Volumes** assigned to different Containers can be selected and removed at the same time, there is no need to handle one Container at a time.

Right click on the highlighted **Volumes** and select Special Operations > Modify > Assign to new/no Container

From the **Container Selection** window check the Select No Container checkbox at the top left. This will remove the displayed Containers.

Click OK to remove the [Volumes](#) from the assigned Containers and exit back to the inventory window.

TapeMaster will now display the [Volumes](#) with no assigned Containers.

Remove Volumes Via The Container Media Inventory Window

Purge Container Contents

Right click on the Container you want to remove the [Volumes](#) from and select Special operations > Container > Purge.

Multiple Containers can be purged together by selecting them, using Shift+Click or Ctrl+Click, before right clicking and selecting Special operations > Container > Purge.

Then click Yes to **Confirm purge** popup.

TapeMaster will now display the remaining Container contents, in this example as 0 as all **Volumes** were removed.

Remove Volumes Via The Container Properties Contents Tab

Right click and select Properties, or double click, the required container.

Select the Container Contents tab.
