Remove Volumes From Container

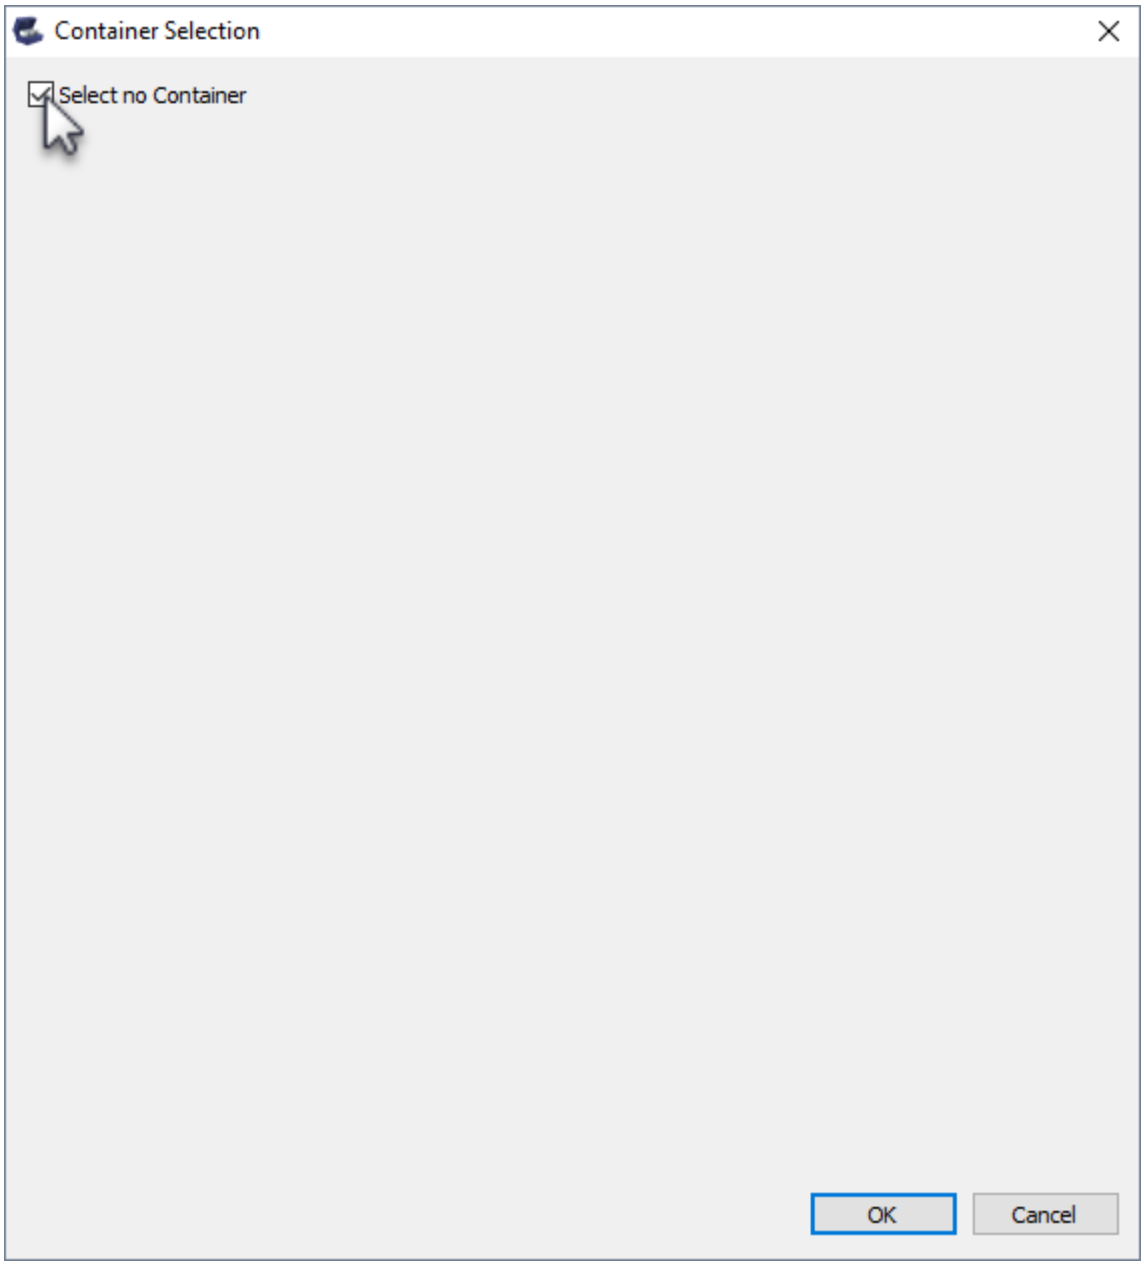

Remove Volumes Via The Inventory Window

master_volume_from_container.mp4

Select a volume or range of volumes (shift + click and or control + click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

From the **Container Selection** window check the `Select No Container` checkbox at the top left. This will remove the displayed containers.

Click OK to remove the volumes from the assigned containers and exit back to the inventory window.
