Select a volume or range of volumes (Shift+Click and or Ctrl+Click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

The screenshot shows the TapeTrack TapeMaster™ (GazillaByte) interface. The main window is titled 'Volumes' and displays a list of volumes. The columns are: ID, Current Location, Target Location, Flags, Container, and Description. The 'Container' column shows various containers like 'US02.CONT.CONT001' and 'Unassigned'.
