

Remove Volumes From Container

Remove Volumes Via The Volume Media Inventory Window

[master_volume_from_container.mp4](#)

Select a volume or range of volumes (Shift+Click and or Ctrl+Click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

The screenshot shows the TapeTrack TapeMaster™ (GazillaByte) interface. The main window is titled 'Volumes' and displays a list of volumes. The 'Container' column shows various containers, and the 'Description' column shows 'Friday Backup' and 'Monthly January'. The 'Total Items' is 263, 'Total Selected' is 1, and 'First Selection' is 44. The 'Repositories' section at the bottom shows icons for GemTrac, Library, and Offsite Vault.

ID	Current Location	Target Location	Flags	Container	Description
000000L6	GemTrac		Cn	Unassigned	
000001L6	Library		Cn	Unassigned

Total Items: 263 Total Selected: 1 First Selection: 44

Repositories: GemTrac, Library, Offsite Vault

Connection 127.0.0.1 uses AES 256 bit encryption

Right click on the highlighted Volumes and select Special Operations > Modify > Assign to new/no container

From the **Container Selection** window check the Select No Container checkbox at the top left. This will remove the displayed containers.

Click OK to remove the Volumes from the assigned containers and exit back to the inventory window.

TapeMaster will now display the Volumes with no assigned containers.

Remove Volumes Via The Container Media Inventory Window

Purge Container Contents

Right click on the Container you want to remove the Volumes from and select Special operations > Container > Purge.

Multiple Containers can be purged together by selecting them, using Shift+Click or Ctrl+Click, before right clicking and selecting Special operations > Container > Purge.

Then click Yes to **Confirm purge** popup.

Remove Volumes Via The Container Properties Contents Tab

Right click and select Properties, or double click, the required container.

Select the Container Contents tab.
