

Remove Volumes From Container

Remove Volumes Via The Volume Media Inventory Window

[master_volume_from_container.mp4](#)

Select a volume or range of volumes (Shift+Click and or Ctrl+Click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

The screenshot shows the TapeTrack TapeMaster™ (GazillaByte) interface. The main window is titled 'Volumes' and displays a list of volumes. The columns are: ID, Current Location, Target Location, Flags, Container, and Description. The 'Container' column shows various containers like 'US02.CONT.CONT001' and 'Unassigned'. The 'Description' column shows 'Friday Backup' and 'Monthly January'. The 'Total Items' is 263, 'Total Selected' is 1, and 'First Selection' is 44. The 'Repositories' section at the bottom shows icons for GemTrac, Library, and Offsite Vault.

Purge Container Contents

Right click on the Container you want to remove the Volumes from and select Special operations > Container > Purge.

Multiple Containers can be purged together by selecting them, using Shift+Click or Ctrl+Click, before right clicking and selecting Special operations > Container > Purge.

Then click Yes to **Confirm purge** popup.

TapeMaster will now display the remaining Container contents, in this example as 0 as all Volumes were removed.

Remove Volumes Via The Container Properties Contents Tab

Right click and select Properties, or double click, the required container.

Select the Container Contents tab.
