

Zones Tab

The Zones Tab in the [Repository Properties Window](#) is used to assign Zones to a [Repository](#).

Zones can be created using the Zone Administration utility located under the Administration Menu.

Assigning a Zone to a Repository

To assign a Zone:

1. Double-click an unused Zone index number or right-click on a Zone Index number and select "Properties." This will launch the "Edit Range Information" window.
2. Using the Zone ID drop down menu, select a Zone to add to this [Repository](#). The Slot Total field will display the maximum number of [slots](#) that the selected Zone can have.
3. Use the Slot Range sliders to adjust which [slots](#) are assigned to the current [Repository](#).
