System Requirements

Prerequisite Software

There is no pre-requisite software required to install and run the TapeTrack TapeMaster software. You may, however, consider using the following options:

- An enterprise scheduler to submit and track TapeTrack batch tasks.
- The Apache Web Server (Version 2 or above) to implement the TapeTrack iCalendar component.
- A distributed backup agent to backup the TapeTrack Database.

Minimum Requirements

TapeTrack TapeMaster must have a network connection to a TapeTrack Framework Server.

We recommend the following minimum specifications:

- 2 or more CPU cores.
- 4 GB of RAM.
- 2 GB of additional hard disk space.
- 1 Ethernet connection.

Virtualization Support

The TapeTrack TapeMaster software runs without issue in a virtualization environment and is regularly deployed under:

- VMWare ESX.
- Windows Hyper-V.
- Xen.
