Setting TapeTrack License

When initially installed, the TapeTrack Framework Server will allow up to 100 Volumes. This allows you to view and trial the TapeTrack software in a fully functioning version limited only by Volume capacity.

To add more than 100 Volumes, you will need upgrade your TapeTrack license.

License options are:

- **Temporary license**: A temporary license key will allow you to operate the TapeTrack Software without restriction other than a 12 day expiry date. This mode of licensing is reserved for those evaluating the TapeTrack software or those needing a license expiry extension in an emergency situation. Obtaining a Temporary License requires TapeMaster installed on a computer with internet access.
- **Trial License**: A 90 day trial license allows a fully functional installation of TapeTrack to evaluate the software to ensure it is the correct tool to manage your backup Volumes.
- **Permanent License**: A permanent license key will allow you to operate the TapeTrack software without restriction until the expiry date associated with your license occurs. Permanent license/s to TapeTrack are restricted to those who have a written End User License Agreement (EULA) with GazillaByte.
