Changing Other Users Passwords

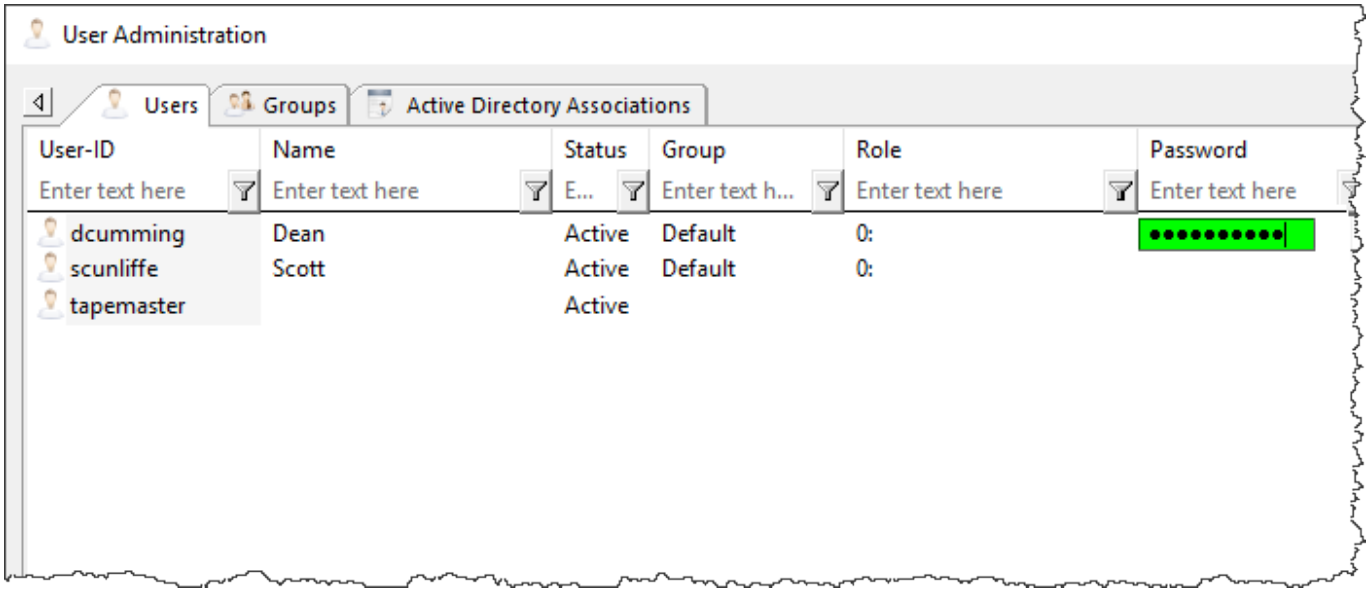

On the menu click `Administration` → `Group/User Administration`.

If the menu option **Administration** is greyed out and inaccessible, you do not have sufficient privileges (tapemaster rights) to alter the software license

The password can be changed in this screen by simply clicking in the password field of the required user and typing the new password. If the password is longer than the display field you will need to expand the password column to an appropriate size before entering.

Click the X at the top of the screen to exit.

It is a good practice to have any user you change the password for to have them reset their password the next time they logon.
