

Volume Global View

Volume Global View allows you to view and/or search [volumes](#) across all [customers](#) and [media](#) types within the one report.

To open **Volume Global View** select from the main menu Tools → Volume Global View.

The **Global View Scope** window opens with wildcard (*) values for each search field by default which will include every volume within TapeTrack in the report.

The output results can be focused at this stage if a more refined report is preferred by using [String Filters](#) on the Customer ID or Description field and/or the Media ID or Description field.

Global View Scope

You may now select a list scope.

It is not essential to set a scope, but if you only require a specific scope the list process may be faster.
