

Volume Global View

Volume Global View allows you to view and/or search [volumes](#) across all [customers](#) and [media](#) types within the one report.

To open **Volume Global View** select from the main menu Tools → Volume Global View.

The **Global View Scope** window opens with wildcard (*) values for each search field by default which will include every [Volume](#) within TapeTrack in the report.

The output results can be focused at this stage if a more refined report is preferred by using [String Filters](#) on the [Customer ID](#) or [Customer Description](#) field and/or the [Media ID](#) or [Media Description](#) field. The Attribute Index allows the selection of which [Extended Attribute](#) to display in the report

(Description or Attribute 0 is the default value). Only results that meet all filters used will be displayed.

Global View Scope

You may now select a list scope.

It is not essential to set a scope, but if you only require a specific scope the list process may be faster.
