Plugins

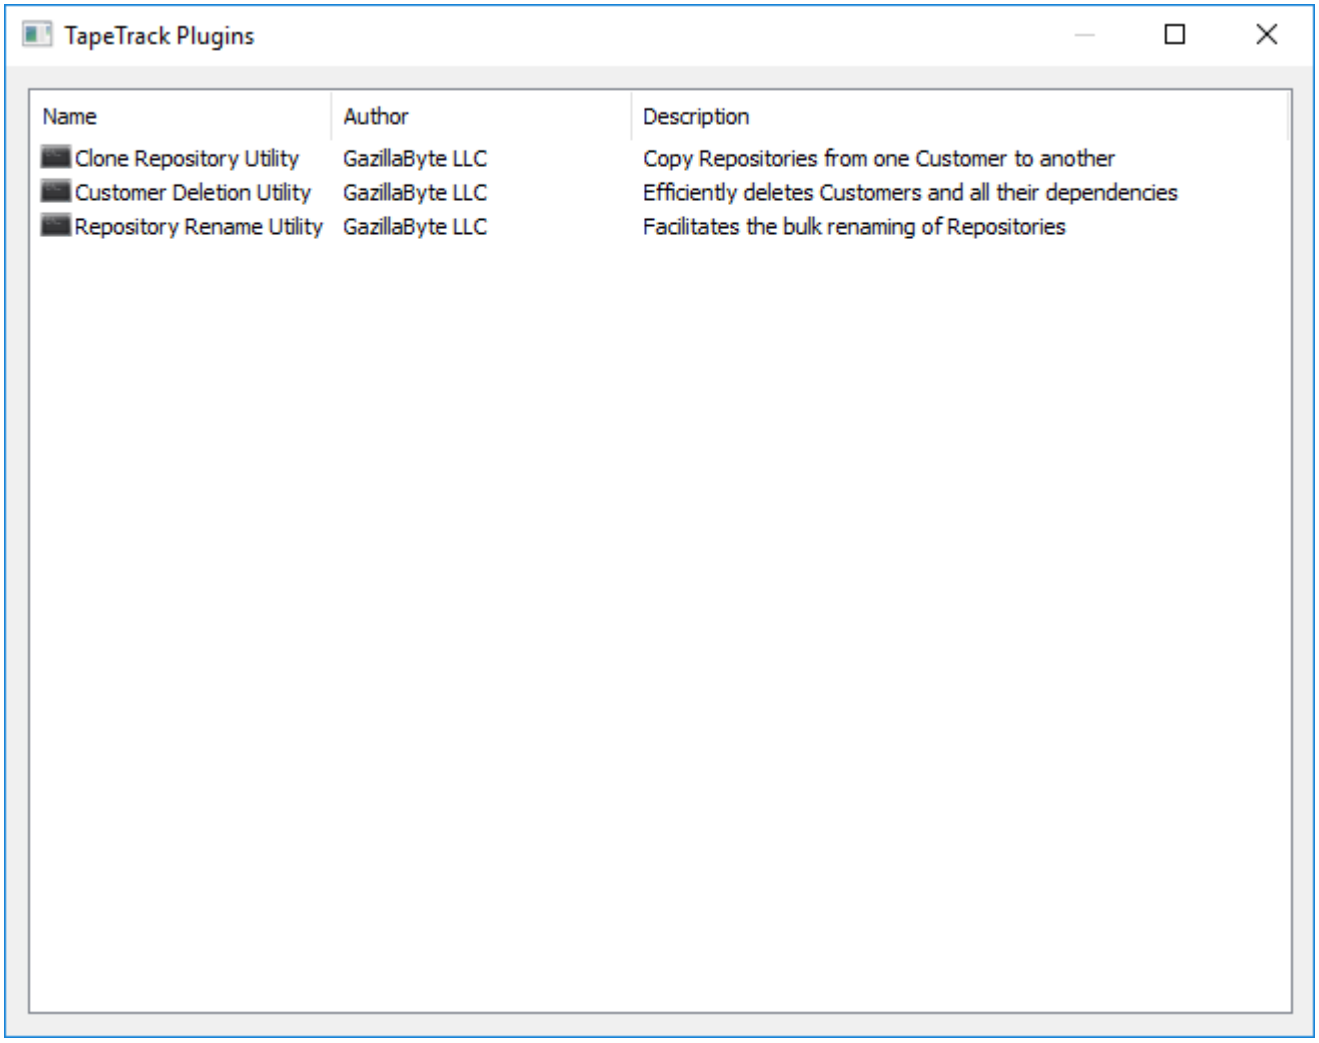

The **Plugins** window under the `Tools` menu displays a list of plugins currently installed in TapeTrack.

There are three built-in plugins that come with each TapeMaster install. They are:

- Clone Repository Utility: Duplicates a Repository and puts it in another Customer.
- **Customer Deletion Utility**: Will delete a Customer and all of the Media Types, Repositories, and Volumes.
- **Repository Rename Utility**: Will change a Repository-ID and move all Volumes from the old Repository-ID to the new one.

To run a plugin, double-click it.

Clone Repository Utility

Duplicates a Repository and puts it in another Customer.

Template Repository

- **Customer**: Enter the Customer you want to clone the Repository from.
- **Media**: Enter the Media type to duplicate.
- **Repository**: Enter the Repository-ID.

Target(S)

- **Customer**: Enter the Customer you want to clone the Repository to.
- **Media**: Enter the Media type that will be duplicated.
