

90 Day Trial License

A 90 day trial license allows a fully functional installation of TapeTrack to evaluate the software to ensure it is the correct tool to manage your backup volumes.

To Upgrade your free license to a 90 day trial license:

While logged to in TapeMaster as [tapemaster](#), or [user-ID with tapemaster rights](#)

From the menu click Help → Framework Server Licensing

If the menu option **Framework Server Licensing** is grayed out and inaccessible, you do not have sufficient privileges (tapemaster rights) to alter the software license

In the TapeTrack License window change the default values to your preferred details:

Server Details

Change Owner (A) from ACME Corp to your company name (e.g. **GazillaByte LLC**)

Change description (A) value to something more relevant (e.g. **Production**)

Set Expiry Date (B) to new expiry (e.g. 90 days from today)

License Limits

Change Volumes (C) to desired number (0 = unlimited)

The screenshot shows a 'TapeTrack License' window with a close button (X) in the top right. It contains two main sections: 'Server Details' and 'License Limits'. The 'Server Details' section has a table with the following data:

Server Details	
Owner	GazillaByte LLC
Description	Production
License Key	T6E5-NSDT-85KC-FD43
Magic Number	1194016902752965329
Expiry Date	Saturday, August 12, 2017
License Status	OK

The 'License Limits' section has a table with the following data:

License Limits	
Users	0
Customers	0
Volumes	0

Below the 'License Limits' table is a button labeled 'Update Statistics'. There are three purple circles with letters A, B, and C overlaid on the image: A is over the 'Production' description, B is over the 'Saturday, August 12, 2017' expiry date, and C is over the '0' for customers in the license limits.

Exporting License

Once all changes have been made, click **Apply license changes** and **Export license** to a file to export updated license file to a known name (e.g. `license_export.cfg`) and location.

Check the information in the config file (`license_export.cfg`) by opening in Notepad or similar text editor and check all information has been updated and is correct. If it is not correct, delete the file and repeat the above steps with correct information.

The screenshot shows a Notepad window titled 'license_export.cfg - Notepad'. The menu bar includes 'File', 'Edit', 'Format', 'View', and 'Help'. The text content of the file is as follows:

```
license :
{
  owner = "GazillaByte LLC";
  description = "Production";
  key = "T6E5-NSDT-85KC-FD43";
  magic_number = "1194016902752965329";
  expiry = "Aug 12 2017";
  limits :
  {
    users = 0;
    customers = 0;
    volumes = 0;
  };
};
```

Forward this file to support@gazillabyte.com with a subject indicating that you require a new license key. Once a new key has been cut you will receive a new license config file with instructions for installation.
