Volume History Table

The Volume History Table displays in a table format. Volumes are displayed in ID order by default.

Selecting Volumes for Display

Select all volumes by right-clicking in the inventory window and select `Select→All`, or using shift+click and/or control+click select the range of tapes required.

Right click the selected volumes and click `View→History`.

Displayed data can be filtered by using the TapeTrack String Filters

Exporting Results

To export data, highlight required volumes, right-click and select `Export` (or press Ctrl+ E) to open **Export Type Selection**.

Select output format using the radio buttons, set checkbox `Open file when export is complete` and click `OK`.

Click the X in the top right of the window to close.
