History Rewind

History rewind function allows you to view your inventory of volumes based on a selected date, or differences in inventory between selected dates.

History Rewind On A Selected Date

Right click in the inventory window and select `View` → `History Rewind`

From the **History Rewind** window click the calendar icon in the drop down list to select the required date.

Volumes will be displayed, in volume-ID order by default, showing location on the selected date. Volumes that were not part of the inventory at that date, but are currently, will be displayed as **Did not exist** with a red flag icon.

Selected date may be changed by either selecting another date from the drop down list or by scrolling, forwards or backwards, with the arrow buttons at the top right of the window.

Volumes within the list can then be exported to file by selecting the required volumes from the list and then right clicking and selecting `Export` → and then choosing file type.

Other right click options include

- Properties - Opens up the volume's properties window. If more than one volume is selected the properties windows will be opened sequentially, each one after the current window is closed.
- Download History - Downloads the history records of the volumes selected into a reference table.
