Attribute Pie

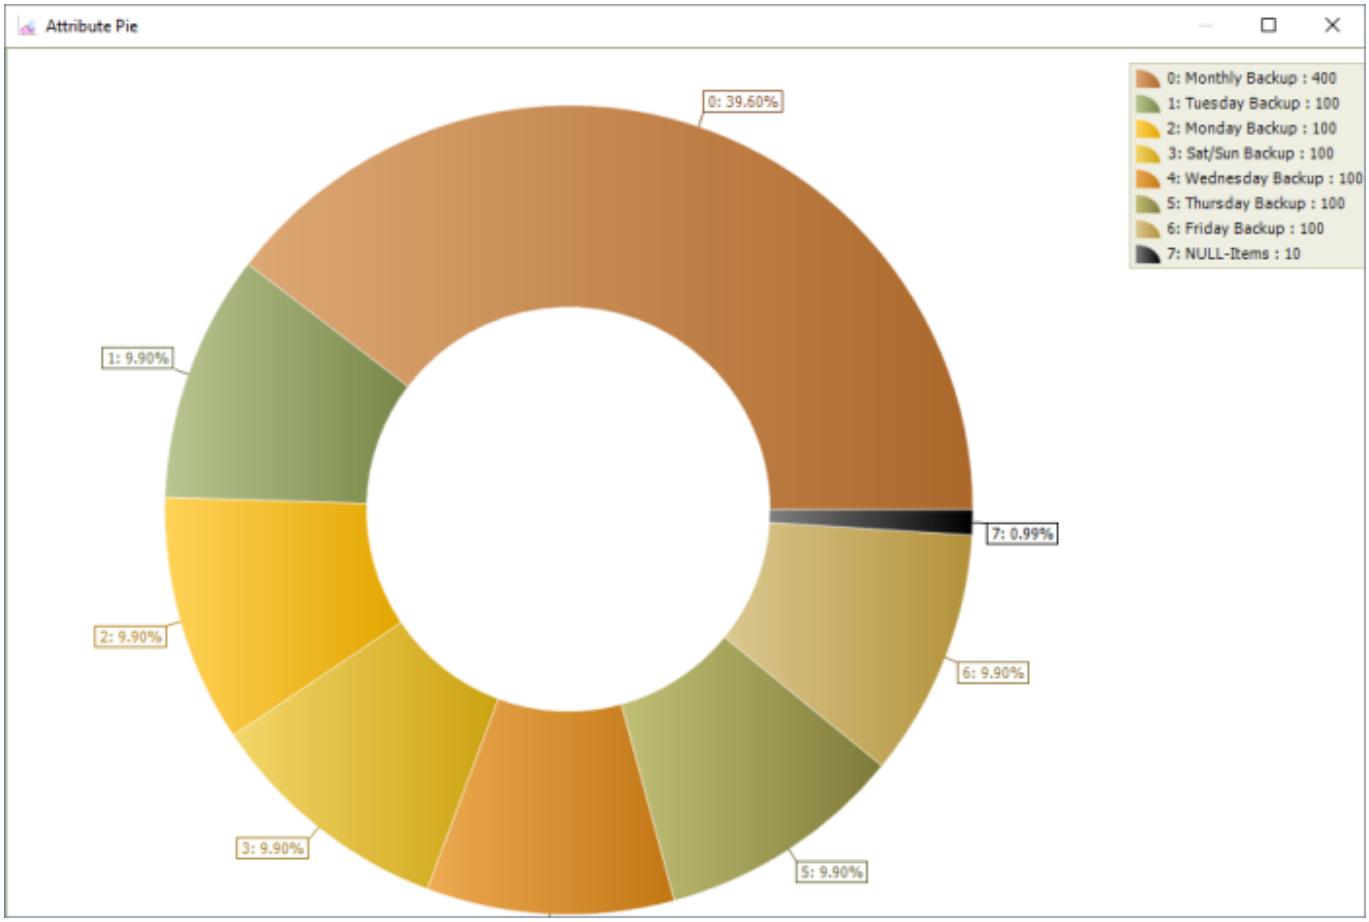

The attribute pie graph displays volume attribute data in a simple easy to read format. Volumes are grouped by similar attribute values and displayed in a % based format with a color coded key.

Selecting Volumes for Display

Select all volumes by right clicking in the inventory window and select `Select→All`, or using shift+click and/or control+click select the range of tapes required.

Right click the selected volumes and click `View→Attribute Pie`.

Click the X in the top right of the window to close.
